Notes:

- 1) Design fixtures are made to order as individual illumination art pieces. Certain imperfections may incur.
- 2) Because these pieces are custom and made to order they cannot be returned for any reason other than non-functionality.
- 3) General lead time on custom order chandeliers is 12 weeks. Individual lead times may vary and will be given when an order is received.

Stranded Fiber**FiberSpots** **Non-Cabled, Stranded Fiber, end emitting**

End emitting stranded fiber optic cable. Can be used with all stranded fiber fixtures for downlighting, case lighting, step lighting and for creating decorative patterns of light. Recommended in lengths up to 30'. Allow 3' to 5' service loop per end. Can be cut, harnessed and ferruled at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Use LB-HK-3, FS-163, or FS-118 tools for ferruling. Minimum bend radius is 4x outer diameter. Factor harnessing available upon request. Consult factory. Priced Per Foot.

Stranded Fiber

Star Cable

Non-Cabled, Stranded Fiber, end emitting

End emitting fiber optic cable in different diameters to create star ceilings or other points of light that require varying degrees of brightness. Recommended for star ceilings in lengths up to 30'. Allow 3' to 5' extra fiber per end. Can be cut and harnessed at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.

BritePak

Cabled, stranded fiber, side emitting

Side emitting stranded optical fiber. Patented cabling method allows maximum light distribution through the clear outer jacket. Recommended in lengths up to 100' for direct view applications, 50' for indirect applications. Both ends should be terminated. Allow 3' to 5' service loop. Can be cut to length at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.

POLICIES: Order Processing

BEFORE AN ORDER CAN BE RELEASED TO MANUFACTURING:

1. The order must be sent via fax, e-mail or mailed by the representative agency with rep cover PO.
2. The original purchase order from the distributor or “bill to” must also be faxed or e-mailed. **Dollar amount on customer PO must match PO from representative, and a job name must be listed.**
3. When an order does not meet the minimum required order amount of \$100.00, a \$25.00 service charge is to be added to the order, except for replacement parts (lamps, c/w motor, ballast, etc.).
4. When an order is from a new distributor, and dollar amount is \$2000.00 or more, the customer may apply for credit terms. A signed credit application should be sent with the order. Allow 5-7 working days for credit approval processing. Orders from new customers under \$2000.00 must be pre-paid at the time of order placement via check, Visa, Master Card; no COD’S.
5. When an order must ship the same day the purchase order was received, a \$50.00 same day rush charge must be added to the order. **Same day shipments apply to stocked items only.** (Illuminators are not stock items) This charge is in addition to the equipment prices and freight. The order must be received by 10:00 a.m. PST of that same shipping day, with a follow-up call for confirmation.
6. All custom and built to specification orders require a 50% deposit. This includes but is not limited to: the Lightly Expressed and European Design fixture series, custom fiber optic harnesses, non-catalogued items, and projects requiring on-site factory services or installation.
7. The purchase order must reference a job name, specifier, job location, Fiberstars’ estimate/quote number and terms.
8. If distributor is already set up with open credit, standard terms of Net 30 days must be indicated on the purchase order.
9. **ACCEPTABLE TERMS OF SALE: Factory, Ex-works, Origin or Shipping Point.** Applicable sale term must be clearly indicated on customer purchase order.
10. **STANDARD FREIGHT TERMS: Customer purchase order must reflect our standard freight terms,** which are collect or pre-paid & add. When freight term is “collect”, a designated carrier and account number must be provided w/ order.
11. **Customers in the states of CA, NY, OH, TX, VA, & WA must have a Tax Resale Certificate** on file or sales tax will be charged.
12. To ensure the fastest delivery, all pertinent information should be included. Lack of information will delay the order process.

PRODUCT SPECIFICATIONS:

1. When listing individual part numbers, always make sure that every part number is complete. For example, when ordering any illuminator, specify the following:
 - a. Type of lamp for 404N and 405N only – 3000°K or 4000°K
 - b. Speed of color wheel motor (1.0 or 3.6 RPM)
 - c. Color wheel selection (for C1, C4 or C8) and the sequence of colors, start color for synchronized units
 - d. Voltage/Hz (120V, 60Hz, etc)
 - e. Options (synchronization, variable delay, dimmable ready, DMX, etc)
2. When ordering fiber optic cable or track, the quantity should be indicated as a unit of measure: fiber footage / # of pieces of track. (If more than one cut is required on fiber length, a cutting charge per cut will be incurred).
3. Make sure all installation materials are included in the order such as silicone, epoxy, ferrules double-sided tape, etc.
4. Always remember to add a hot knife to all new orders. It is a required and reusable tool for installation (Part number FS-118, FS-163, or LB-HK3).
5. Please indicate on the customer’s PO request for partial shipment of material.

POLICIES: Terms and Conditions

Credit

All new accounts must have a credit application and state resale card (CA, NY, OH, TX, VA, & WA only) on file before an order can be processed. An initial order must be over \$2,000.00 US before an open account status can be considered. Open account status for domestic orders is extended only to companies that are: 1) medium or large size, 2) established, and 3) have a good credit history. Unless credit is established, all sales are Check with Order, approved credit card only, no C.O.D's.

Terms

Payment terms are Net 30 days from shipping date. **All custom orders require a 50% deposit.** Late charges of 1-1/2% per month will be added to all past due invoices and represent the deferred price of the item purchased. Energy Focus, Inc. /Fiberstars reserves the right to hold any orders if an account has open invoices which extend beyond payment terms.

Orders: Orders will only be accepted with a written purchase order signed by an authorized agent of the issuing customer.

Minimum Billing: Any order less than \$100.00 will incur a \$25.00 additional processing charge.

Cancellation

If a sales order is cancelled after the order has already passed credit and is in production, there will be a \$100.00 cancellation processing fee as well as up to a 50% restocking charge.

Freight

All prices are FOB Factory, NO Freight Allowed. Unless otherwise specified, method of shipment will be determined by Fiberstars. Orders requesting shipment within 24 hours will incur a \$50.00 additional processing charge. All estimates of freight costs before actual shipment are only estimates and Energy Focus, Inc. /Fiberstars is not liable for the difference between an estimate and the actual cost of the shipment. Purchase orders must indicate "FOB Factory, Ex-works or Origin" and "Collect or Prepay & Add." Any special shipping instructions (i.e. Overnight) must be indicated on purchase order, and a shipping account number must be provided.

Loss or Damage: The customer should take up loss or Damage Loss of damage of shipments with the customer's local agent of the shipping firm. We will provide a copy of the original bill of lading and can provide assistance in filing your claim with the carrier.

Limited Warranty: Energy Focus, Inc. /Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus, Inc. /Fiberstars. Energy Focus, Inc. /Fiberstars warrants its illuminators, hardware and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to be the specifications outline by Energy Focus, Inc. /Fiberstars. In the event of a defect in material or workmanship during the warranty period, Energy Focus, Inc. /Fiberstars will repair or replace (at its option) your lighting system component, under the conditions of the warranty. See Limited Warranty Policies sheet for details.

Returns

All returns require a Return Goods Authorization Number (RGA #). Energy Focus, Inc. /Fiberstars will not be responsible for product returned without an RGA #. Call Fiberstars Customer Service Department at (888) 704-2292, before returning any goods. A minimum restocking charge of 50% will be made on standard products returned in their factory sealed shipping cartons within three months of original shipping date. Customer is responsible for shipping both ways. Custom products, including fiber optic cable cut to length, are not returnable. Refer to Returned Goods Authorization Policies sheet for further details.

Taxes: Any Federal or State Excise Tax for which we may be liable on any sale will be charged to and paid by the buyer. Customer is responsible for furnishing resale certificate.

Payment of Invoices

Remit to Energy Focus, Inc, Dept CH 17516, Palatine, IL 60055-7516

POLICIES: Returned Goods Authorizations

Obtain an RGA Number

All returns require a Return Goods Authorization Number (RGA #). Call Fiberstars; Customer Service Department at (888) 704-2292 to obtain an RGA number before returning any products. Energy Focus, Inc./ Fiberstars will not be responsible for product returned without an RGA number.

Expiration Date

RGA numbers are good for a period of 90 days from issuance.

Minimum Restocking Charge

A minimum restocking charge of 50% will be made on standard products returned in their factory sealed shipping cartons within three months (90 Days) of original shipping date. Products are not returnable for credit or exchange after 90 days.

Custom products including fiber tubing cut to length, color wheels, products that have opened cartons and/or products that have been used are not returnable.

Shipping

Energy Focus Inc./ Fiberstars is not responsible for shipping charges incurred when returning product to or from the factory. When returning any products, the RGA number must be clearly marked on each carton. Products should be returned to: Fiberstars Receiving; Energy Focus, Inc. 7051 Commerce Circle, Pleasanton, CA 94588 (925) 463-5520

Limited Warranty

Energy Focus Inc./ Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. Energy Focus Inc./ Fiberstars warrants its illuminators, hardware and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. In the event of a defect in material of workmanship during the warranty period, Energy Focus Inc./ Fiberstars will repair or replace (at its option) your lighting system component, under the conditions of the warranty. See Limited Warranty Policies sheet for details.

Reimbursed Costs

Energy Focus Inc./ Fiberstars is not responsible for costs incurred when removing product to be returned for repair or for reinstallation costs after repair.

POLICIES: Limited Warranty

Energy Focus Inc./ Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period to **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. Energy Focus Inc./ Fiberstars warrants its illuminators, hardware, and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase. A Lighting System is defined as an Energy Focus Inc./ Fiberstars illuminator coupled with Energy Focus Inc./ Fiberstars. fiber optic cable to deliver fiber optic lighting. The use of an Energy Focus Inc./ Fiberstars component (illuminator or fiber optic cable) with a non-Energy Focus Inc./ Fiberstars component voids all warranties. Energy Focus Inc./ Fiberstars components are designed to be part of an Energy Focus Inc./ Fiberstars system. Their use with other components will affect their performance and therefore will not be under warranty.

In the event of a defect in material or workmanship during the warranty period, Energy Focus Inc./ Fiberstars will repair or replace (at its option) the component (s) under the conditions of this Warranty. Energy Focus Inc./ Fiberstars will do so at its expense for the cost of materials but not for shipping. **THIS REMEDY IS THE SOLE AND EXCLUSIVE REMEDY FOR ANY AND ALL CLAIMS RELATING TO ANY BREACH OF WARRANTY BY ENERGY FOCUS INC. / FIBERSTARS**

LIMITATIONS, EXCLUSIONS AND OTHER RIGHTS:

- A. EXCEPT AS PROVIDED HEREIN, ENERGY FOCUS, INC. / FIBERSTARS MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ALL SUCH WARRANTIES ARE EXPRESSLY DISCLAIMED. Some states do not allow the exclusion of an implied warranty, so the above exclusion may not apply to you.
- B. IN NO EVENT SHALL ENERGY FOCUS, INC. / FIBERSTARS BE LIABLE FOR INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, EVEN IF ENERGY FOCUS, INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. THIS DISCLAIMER APPLIES DURING AND AFTER THE WARRANTY PERIOD. Some states do not allow the exclusion or limitation of indirect, incidental or consequential damages, so the above limitation or exclusion may not apply to you.
- C. ENERGY FOCUS, INC. / FIBERSTARS is not responsible for defects or malfunctions in and/or damage to Lighting Systems where a sale is specifically made without warranty. In such sales, the disclaimers of warranty and liability, set forth above, shall continue to apply.
- D. This Warranty covers normal consumer use and does not cover damage which occurs in shipment or failure with results from alteration, theft, misuse, abuse, abnormal use, negligent installation, improper maintenance or where adequate care has not been taken to prevent ice or snow damage to the Lighting System.
- E. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

If you discover a defect or malfunction during the period to which this WARRANTY applies, write or phone Fiberstars for information on receiving warranty service. Please address your inquiries to:

ENERGY FOCUS LIMITED WARRANTY ON LED PRODUCTS

Energy Focus Inc. warrants its LED products to be free from defects in material and/or workmanship, under normal use and service for a period of 5 years from the date of manufacture, provided the product is installed to the specifications outlined by Energy Focus, Inc. Warranty pertains to product failure of zero light output.

LED Accessory products are guaranteed to be free from defects in material and/or workmanship, under normal use and service for a period of 1 years from the date of manufacture, provided the product is installed to the specifications outlined by Energy Focus, Inc.

In the event of a defect in material or workmanship during the warranty period, Energy Focus Inc. will repair or replace (at its option) the component(s) under the conditions of this warranty. Energy Focus Inc. will do so at its expense for the cost of materials but not for shipping. **THIS REMEDY IS THE SOLE AND EXCLUSIVE REMEDY FOR ANY AND ALL CLAIMS RELATING TO ANY BREACH OF WARRANTY BY ENERGY FOCUS INC.**

LIMITATIONS, EXCLUSIONS AND OTHER RIGHTS:

- 1) Except as provided herein, Energy Focus Inc. makes no other warranties, express or implied, including but not limited to the implied warranties of merchantability or fitness for a particular purpose, and all such warranties are expressly disclaimed. Some states do not allow the exclusion of an implied warranty, so the above exclusion may not apply to you.
- 2) In no event shall Energy Focus Inc. be liable for indirect, incidental, or consequential damages, even if Energy Focus Inc. has been advised of the possibility of such damage. This disclaimer applies during and after the warranty period. Some states do not allow for the exclusion or limitation of indirect, incidental or consequential damages, so the above limitation or exclusion may not apply to you.
- 3) Energy Focus Inc. is not responsible for defects or malfunctions in and/or to the product where a sale is specifically made without warranty. In such sales, the disclaimers of warranty and liability, set forth above, shall continue to apply.
- 4) This warranty covers normal consumer use and does not cover damages which occur in shipment or failure with results from alteration, accident, theft, misuse, abuse, abnormal use, negligent installation, improper maintenance or where adequate care has not been taken to prevent damage to the product.
- 5) This warranty gives you specific legal rights, and you may have other rights which vary from state to state.

This warranty covers the following product series:

LEDDL DockLights, LEDLS LandScape Lights, EFO-LEDSG & EFO-LEDLG GlobeLights, LEDGL HazGlobe Series, LEDTR TrackLights, LEDFLT8 Tube Lamps.

For any other Energy Focus LED products not covered in this warranty, please inquire with Customer Service at (888) 704-2276 or by email at customerservice@fiberstars.com

Fiberstars is a division of Energy Focus, Inc. and all products sold through the Fiberstars channel are protected by this warranty.

If you discover a defect or malfunction during the period to which this warranty applies, write or call Energy Focus Inc. for information on receiving warranty service.

Technical Information: GROUP RE-LAMPING

A group re-lamping program is extremely important to ensure the integrity of fiber optic lighting projects.

- **In an end-emitting application (i.e. downlights) group re-lamping is crucial to ensure consistent light output from downlights in an area.** Lamps must be replaced in all illuminators at the same time. If the lamps are replaced on an “as needed” basis, some groups of downlights will appear brighter and/or different color than other groups of downlights.
- **The situation is even more noticeable with a side-emitting application (i.e. neon replacement).** For example, if you have a lamp failure in one illuminator on a run of fiber that is fed from two illuminators and only the failed lamp is replaced; your fiber run could be noticeably brighter at one end than at the other. To avoid this situation, group re-lamping is the solution.
- **Group re-lamping should take place at 80% of manufacturer’s rated lamp life.** A percentage of the working lamps replaced should be kept. These lamps would be used for any early failure and should last until the next scheduled re-lamping.
- **If lamps are burned beyond rated life, light output diminishes** while energy consumption and risk of rupture increases. Metal halide lamps are constructed of an outer bulb with an internal arc tube made of quartz. The arc tube operates under high pressure at very high temperatures. The arc tube and the outer bulb may unexpectedly rupture due to internal causes or external factors.
- **Continuous operation can lead to unexpected lamp rupture.** Since Energy Focus Inc./ Fiberstars’ EFO illuminators use metal halide lamps, we recommend that in continuously operating systems (24 hours/day, 7 days/week), turn lamps (illuminators) off once per day for at least one hour. Failure to comply increases the chance of rupture. Please include this recommendation on all projects that are specified with Energy Focus Inc. / Fiberstars fiber optic lighting systems.
- **Without a re-lamping program, projects have a tendency to deteriorate.** Low light and/or uneven output will result in complaints, which will lead to customer service calls. The bottom line is that Energy Focus Inc. / Fiberstars and fiber optic lighting in general will be viewed in negative light.

Please encourage your specifiers and end-users to utilize a group re-lamping program. This will keep all Energy Focus Inc. / Fiberstars projects working to their maximum potential, which will keep the customer satisfied.

TROUBLESHOOTING GUIDE

Fiber optic cable not as bright as when first installed

- Check lamp and re-lamp if necessary
- Inspect fiber cut at port. If uneven, pulled-back, or melted/burnt, fiber port must be re-terminated.

Fiber optic cable has melted

- Verify that illuminator is installed to specifications in installation manual, including appropriate ventilation.
- Be sure fiber port is cleaned before re-porting.
- Recut fiber optic cable at least 8-10 inches behind melted fiber following instructions in installation manual.

Illuminator will not come on

- Check wiring for input voltage.
- Check circuit breaker.
- If a lamp is having trouble starting, it is near the end of its life. Replace lamp.
- Make sure lid is closed completely in order to make contact with the limiting switch.

Illuminators will not sync with each other (UO 5 only)

- Check low voltage wiring. Make sure no wires are crossed or shorted.
- 9V battery test: take the battery to the low voltage wires out of the back of the slave illuminator. Connect the black wire to the negative side of battery. Connect the red and green wire to the positive side of battery. Apply power to the illuminator and the color wheel should rotate. If it does not, contact factory. (This test does not work with master illuminator.)

Illuminator comes on for 5-15 minutes, then turns off

- Check lamp, it may be at the end of its life. Replace lamp.
- Illuminator may be overheating, check ventilation and correct if necessary.

Color wheel will not rotate

- Check color wheel to insure the progress is not impeded.
- Check wiring to switch to insure a good electrical path is present.

TFO Illuminator Mounting

All TFO Illuminators

- Minimum clearance of 24" (on all sides except bottom) and must have sufficient ventilation.
- Must be accessible for relamping and maintenance.
- All illuminators can be mounted horizontally on a flat surface.
- Some can be mounted vertically in the recommended positions below (arrow indicates air flow).
- FS1L and 602 can only be mounted horizontally on a flat surface.

FS7L, FS11L, FS12L, FS13L Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

404N Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) horizontally to a vertical surface (refer to diagrams).

405N Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

601 Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

TFO Porting Instructions

1. Pre Heat the Hot Knife

Plug in or ignite the hot knife (#FS-118, FS-163, or LB-HK-3). Hold or prop the knife vertically so the blade tip is up. Allow it to heat for 8 - 10 minutes.

2. Assemble the Optical Port

Zinc Port

Screw the compression fitting onto the back of the zinc port.

Select a ferrule tip and slide it into the port, using the keyway to align.

Small Ferrule = up to 100 fibers
Medium Ferrule = up to 200 fibers
Large Ferrule = up to 300 fibers
XLarge Ferrule Options: 400, 450, 600

(Special applications. See illuminator sections.)

Plastic Port

Select a ferrule tip and slide it into the port, using the keyway to align.

Small Ferrule = up to 100 fibers
Midsize Ferrule = up to 150 fibers
Medium Ferrule = up to 200 fibers
Large Ferrule = up to 300 fibers

Slide cutting cap over the ferrule.

If using 501 port, slide the black boot over the fiber tubing so the opening faces the ends of the fiber tubing.

Aluminum Port

Select a ferrule tip and slide it into the port. Secure it with the setscrew.

Small Ferrule = up to 100 fibers
Medium Ferrule = up to 211 fibers
Large Ferrule = up to 300 fibers

3. Strip Off the Outer Tubing

About 9" from each end, score around the circumference of the tubing so that it cuts the tubing but not the fibers.

Important: do not nick or cut the fibers. Pull off the outer tubing.

If using BritePak® or SuperStars® fiber optic cable, unwind the mylar wrap and cut off. Loosen the fibers thoroughly from the cabling by rubbing/rolling the fibers between your palms so that they are loose and straight.

4. Insert the Fibers into the Optical Port

Push fibers through the large end of the optical port. Rotate the port to help feed the fibers through easier. The edges of the outer tubing should wedge against the inside of the port where it begins to narrow. The fibers should extend 3" - 4" beyond the ferrule. *Caution: do not break or crimp fibers.*

5. Clamp the Fiber Tubing

Zinc Port

Insert dummy plug if needed to take up extra space. Tighten the compression fitting to apply pressure on the tubing to hold it in place.

Plastic Port

Partially screw down clamp. Use the dummy plugs or spacers to take up extra space. Tighten the screws so the clamp applies pressure on the tubing to hold it in place.

Aluminum Port

Partially screw down clamp. Use the dummy plugs to take up extra space. Tighten the screws so the clamp applies pressure on the tubing to hold it in place.

6. Stuff the Ferrule Tip

With scissors or Fiskars®, cut off about 2" of loose fibers. Stuff the ferrule tip around the edge with these fibers until no space remains between the fibers. This will help prevent the fibers from pulling back or melting.

7. Cut the Fibers with the Hot Knife

Note: This step is critical.

Place the preheated hot knife blade with the cutting edge against the ferrule tip or cutting cap. The top of the blade should tilt slightly away, about 2°. With downward pressure, cut through the fiber bundle. As you cut, rotate the port slowly. Do not saw back and forth. When properly heated, the hot knife should take 10 - 15 seconds to cut the fibers. The fiber ends should look clean and flat. Uneven cuts, debris, or the oil from your fingers will diminish the light output. Once cut, do not touch the fiber ends with your fingers.

(For plastic port, remove the cutting cap.)

8. Insert the Finished Optical Port into the Illuminator

PORT ASSEMBLY/FIBER TERMINATION

A) Insure that the total fiber count of all fiber tubings is 300 or less. If you have more than 300 individual fibers, you will need a second illuminator.

B) Insert the proper size tip into the port and twist with pliers to lock (fig. 1).

C) Strip back all fiber casings no less than 8 inches (fig. 2). Take care not to nick the fibers.

D) Insert the bare fibers into the port so ALL fibers protrude past the port tip (fig 3). Be sure the outer jacket doesn't insert further than the grey compression fitting. Tighten the port compression nut down on the fiber casing (fig 4).

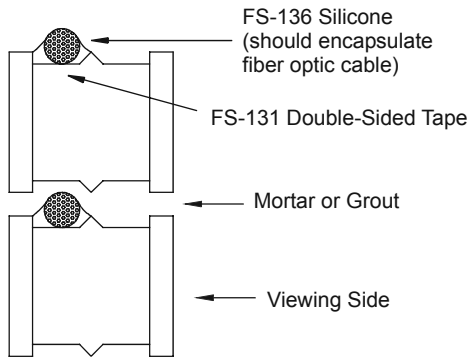

E) IMPORTANT: If the port tip is not completely full, insert short pieces of individual fibers into the tip until it is completely full (fig. 5). This will keep the lit fibers perpendicular to the lamp, and prevent the fibers from overheating.

F) Heat an electric or butane hot knife so it is hot enough to melt the fibers. Apply firm downward pressure on the fibers, with the blade touching the port tip at a slight angle (fig 6). Do not saw at the fibers. Allow the heat of the knife to slowly trim the fibers. Ease the pressure as the knife almost completes the cut. Place the hot knife in a safe place to cool.

6. APPLY STEADY DOWNWARD FORCE WITH HOT KNIFE DO NOT SAW BACK AND FORTH

Glass Block Installation

Note: Diameter of fiber must accommodate glass block clearance.

Mortar Joint Method (Between Mortar Joints)

Mount fiber optic cable directly between glass blocks. Use glass block without edge coating. If you do select a glass block that has edge coating, it must be removed to allow light transmission.

Tack fiber optic cable to the top of the row of glass block with hot glue to hold it in place and create a straight line along the top of the block. Run a heavy bead of Fiberstars silicone adhesive (FS-136) on both sides of fiber optic cable. Apply mortar to joint and set the block.

On the ends of the glass block wall, a channel will have to be created to hide the fiber optic cable where it passes from course to course. This channel must be a minimum of 2" deep to avoid kinking the fiber optic cable.

Backlit Method (Behind Glass Blocks)

Paint background white.

Install track and fiber optic cable 3" - 6" behind glass blocks on white background at the midpoint of each course of glass block. Using adhesive and screws, install track as straight as possible.

Run a bead of adhesive inside the track to help keep the fiber optic cable in place. Press the fiber optic cable into the track, being careful not to kink or bend the fiber optic cable more than a 2" bend radius. Do not use cap.

Edge Lit Glass Installation

**Section View Thru
Fixture & Panel**

NOTES:

1. **(Very Important)** Glass shall support fixture--fixture cannot support glass
2. Glass edge in contact with LightFrame fixtures must be polished or clean break.
3. Acrylic edge in contact with LightFrame fixtures must be polished clear.
4. Install illuminator in vented location within 30 feet of illuminated panel.

Display Case Installation

Tall Case
Vertical Fixture Orientation (Sides)

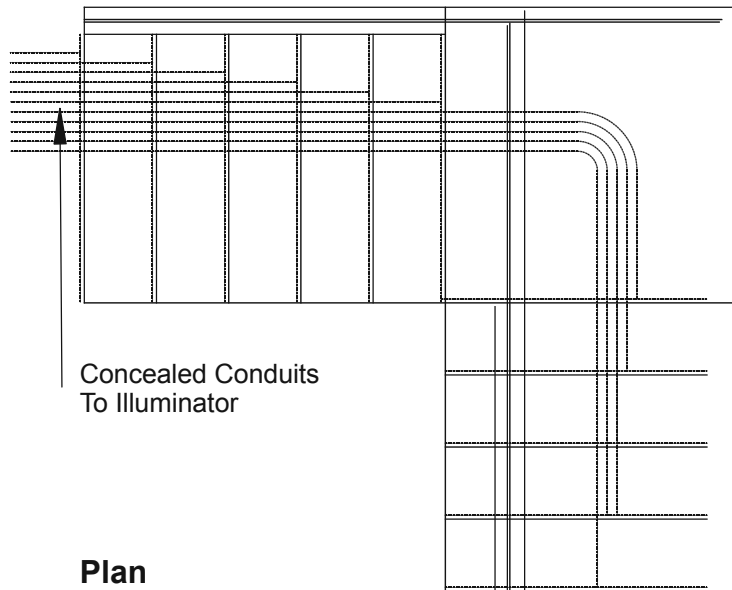

Long Case
Horizontal Fixture Orientation (Top)

NOTES:

1. Attach fixtures with adjustable "Type H" brackets using threaded fasteners and/or VHB type adhesive.
2. Refer to fixture-cable dimensions to determine bend radius of feed Cable.
3. Install illuminator in vented location within 30 feet of illuminated panel.

Stair Riser Lighting Installation

NOTES:

1. Attach fixtures with high performance silicone adhesive (GE IS808) or equivalent.
2. Install illuminator in ventilated location, within 30 feet of stairway.
3. All conduit bends to be sweep type fittings.

Elevation (Section)

Cove Lighting Installation

Page 31

Cove Installation - Cove Glow Illumination

Cove Installation - Ceiling Glow Illumination

Secure track or mounting clips to cove wall with screws (maintain height below viewing angle). Snap BritePak-III® fiber optic cable into track, or LightBeam™ to the mounting clips. Run fiber optic cable ends to illuminator.

Note: When used in a cove, fiber optics will enhance an architectural detail but will not illuminate a room.

Guidelines for using BritePak® in a cove

1. Runs should not exceed 50' between illuminators.
2. Cove interior should be painted gloss white for the best reflective value.
3. Fiber should be installed as high in cove as possible without being seen from viewing area.
4. Installing two runs of fiber optic cable side by side will increase light output.
5. This option is only recommended in low ambient light conditions to create a "glow" in small dimensioned coves.

Guidelines for using LightBeam™ in a cove

1. The first reflective surface should be 4" from the lighted face of a high intensity LightBeam.
2. The first reflective surface should be 6" from the lighted face of a medium intensity LightBeam.
3. Attach LightBeam fixtures with optional brackets and wood screws.
4. Install illuminator in ventilated location, within 30 feet of fixture.
5. Recommended for use in small and medium coves.

Cove Lighting Installation (continued)

NOTES:

1. Attach LightBeam fixtures with optional brackets and wood screws.
2. Install illuminator in ventilated location, within 30 feet of fixture.

The first reflective surface should be:
 4' from the lighted face of a high Intensity LB
 6" from the lighted face of a medium Intensity LB

Star Ceiling Applications

e • (510) 490-3247 Fax • www.fiberstars.com

Page 33

The "Star Ceiling" effect is a frequently requested Fiberstars application. There are too many factors that rely on personal aesthetic choices to give an exact formula for every application. That is why we have created three different "Star Ceiling Kits." **Star Ceiling Kit A** (300 stars) will cover an area from 30 to 140 sq ft depending on star density with a sparkle wheel effect; **Star Ceiling Kit B** (500 stars) will do the same, but also includes a "shooting star" effect, and **Star Ceiling Kit C** (800 stars) will cover larger ceilings, from 100 to 400 sq ft, also with a "shooting star" effect (see spec sheets for details). General guidelines as follows :

How to Achieve the Effect

The "stars" are created by using individual strands of various sizes of multi-strand fiber in our STAR34/50 cable. These strands are threaded through the ceiling material to produce tiny bright points of lights. The fibers are then glued (with #FS-115 epoxy or FS-136 silicone) into place from the concealed side of the ceiling.

Star Size and Saturation

- Small = .75 mm fiber
- Medium = 1.0 mm fiber
- Large = 1.5 mm fiber
- 1 - 6 "stars" per square foot (depending on the effect desired)

Special Effects

- A sparkle wheel is included in each kit's illuminator.
- Star Ceilings Kits B & C also include a "shooting star" effect.

Notes

- For custom star and effect ceilings contact our D/E/Q department at 1-877-777-7389.

STAR 34/50

STAR34/50 contains:

- 24 - .75mm strands
- 7 - 1.0mm strands
- 3 - 1.5mm strands

LOANER EQUIPMENT FORM

PURPOSE

Energy Focus, Inc. keeps a very limited supply of products for representatives to borrow for a specified amount of time.. Many of our custom or 'made to order' products are not available in this program. For custom samples, or samples that the agency intends to keep, please consult our Sample Program details on page 74. Loaner materials are typically requested for the following reasons:

- For when the Agency's equipment is either already loaned out or not working.
- For doing mock-ups when the Agency needs additional equipment to supplement their own equipment.
- For demonstrating a product that the Agency does not own.

TERMS OF USE

- Energy Focus, Inc. takes requests on a first come, first served basis.
- Energy Focus, Inc. requires a minimum of two (2) days to process loaner requests, but some loaners may be subject to standard lead times.
- The typical loan period is thirty (30) calendar days.
- Energy Focus, Inc. pays for standard freight from the factory to the Agency. The Agency or their clients must pay for any expedited shipments.
- The Agency pays for freight to the next destination or back to Energy Focus, Inc. by whatever method Energy Focus, Inc. designates.
- If equipment is not returned on time, a fine of \$100.00 will be deducted from commission; future loan privileges revoked.
- If the representative does not call to request an extension and/or does not respond to repeated communication from Energy Focus, Inc. within a timely manner, the Agency will be invoiced for the full price of the equipment and this amount can be deducted from commission.
- If the equipment is returned either damaged, missing parts or requiring refurbishing, Energy Focus, Inc. will correct the problem and deduct and related charges from the agency's commission.
- If an Agency decides to purchase the equipment they are borrowing, the representative needs to communicate this to Energy Focus, Inc. so an invoice can be issued and Energy Focus, Inc. loaner stock can be replenished. Once purchased, demo equipment is not returnable.

Agency Sample Program

Fiberstars is proud to have this agency sample program. We understand the need to acquire product samples for certain sales opportunities and we want to make this process as easy for everyone as possible.

This program is designed to help you augment existing product sample offerings and to ensure that new samples are being effectively used for sales opportunities. This program is not intended to replace our existing Loaner Equipment program. For specific job mock-ups, our Loaner program is a way for our Agencies to obtain materials for a short period of time so that specifiers and clients can evaluate products for application suitability. For more information about our Loaner Program, please consult page 73 of our 2011 Factory Representative Distributor Net Price Book and Reference Guide.

Fiberstars Standard Sample Purchase Program

(Excludes LED Dock Light, LED Globe Light, LED Landscape Light and LED e-Luminator)

- Purchase order must be submitted by and billed to the Agency with Job Name: SAMPLE
- Program is valid for (1) sample of each eligible product per agency office
- Pricing will be published DN less 30%, no commission, plus freight (PPD/ADD)
- Standard 30 day terms apply
- Job Orders are not eligible for sample pricing
- Subject to restrictions – certain products such as custom light bars and decorative chandeliers may not be available at the same discounted price levels. Please consult your Sales Manager for sample arrangements of custom or ‘made to order’ products.

Fiberstars LED Globe Light / LED Dock Light/ LED LandScape Light Sample Program

- Purchase order must be submitted by and billed to the Agency with Job Name: LED SAMPLE
- Program is valid for (1) sample of each eligible product per agency office
- Pricing will be published DN less 45% at single unit price levels, no commission, plus freight (PPD/ADD)
- 90 day terms will apply
- Job Orders are not eligible for sample pricing

Please consult your Fiberstars sales manager for details on samples of our LED e-Luminator and demo kits.

For questions about our policies, please contact your sales manager or our customer service team at (888) 704-2276.

APPLICATION FOR BUSINESS CREDIT

Credit Department
440-715-1337 / 440-542-1526 (fax)

On the basis of the following data, I/we hereby apply to Energy Focus, Inc. for credit accommodations. The information below as Submitted, is true and correct according to the best of my knowledge. The undersigned agrees to abide by the standard terms & conditions and personal guarantee of sales, as printed below. If you have any questions, please contact the Credit Department.

SEE TERMS AND CONDITIONS ON PAGE 2

www.energyfocusinc.com

TERMS & CONDITIONS AND PERSONAL GUARANTEE

1. Energy Focus, Inc. (Seller) hereby gives notice of its objection to any different or additional terms & conditions.
2. All offers to sell are made F.O.B. point of shipment. Buyer has risk of loss upon shipment from F.O.B. point.
3. Payment terms are 30 days from invoice date unless special financing has been arraigned prior to placing order.
4. Cash discounts for special items, direct shipments or negotiated jobs will be the same as the manufacturer making shipment and will be so indicated on our invoice. Any discount payments received beyond terms from the invoice date will be denied and charged back.
5. In the event Buyer does not pay when due, past due amounts are subject to service charges of 1 ½ percent per month (18% per annum) or maximum permitted by law, whichever is less.
6. All products supplied or services rendered are warranted only to the extent of each manufacturer’s individual warranty. Any manufacturer warranties will be furnished upon request.
7. Seller shall not be liable for any labor or back charges other than those agreed upon in advance, between Buyer and Seller in writing. This acceptance agreement of charges must be documented and endorsed by Seller to be valid.
8. No sales representative of the seller has authority to alter, vary, or waive any of the standard terms and conditions herein.
9. In the event the account is placed in the hands of an attorney or collection agency for collection after default in payment pursuant to the payment terms set forth herein, the customer agrees to pay thirty (30%) percent of the unpaid balance due for attorneys fees, which the customer and guarantor below agree is a reasonable fee, together with applicable costs
10. Seller is not accountable or liable for delays in delivery. Factory delivery dates are the best estimates of our suppliers.
In no case shall Seller be liable for any consequential, incidental or special damages arising from any delay in delivery.
11. The seller or an authorized representative of seller has my permission to contact any references or any other commercial credit agencies.
12. PERSONAL GUARANTEE – If the purchaser is a corporation, limited liability company (LLC), or any other type of business entity, then those signing this application, whether executing this agreement as an officer of the entity or not, do hereby personally guarantee payment for any and all obligations as set forth herein. In the event of the filing of a petition in bankruptcy by the purchaser, or other insolvency proceeding, Energy Focus, Inc. has the right to proceed under the terms of this personal guarantee against the undersigned guarantor.
13. The undersigned has read, understands and agrees to all of the terms and conditions stated on this Credit Application. I understand that if any portion of this Agreement is unenforceable, the remaining provisions will be enforceable. I further acknowledge receipt of a copy of this agreement. I state that I have not been coerced and that I am not signing this Agreement under any duress

I HAVE READ THE ABOVE STATEMENT AND AGREE TO THE ABOVE TERMS
