**Stranded Fiber****FiberSpots** **Non-Cabled, Stranded Fiber, end emitting**

End emitting stranded fiber optic cable. Can be used with all stranded fiber fixtures for downlighting, case lighting, step lighting and for creating decorative patterns of light. Recommended in lengths up to 30'. Allow 3' to 5' service loop per end. Can be cut, harnessed and ferruled at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Use LB-HK-3, FS-163, or FS-118 tools for ferruling. Minimum bend radius is 4x outer diameter. Factor harnessing available upon request. Consult factory. Priced Per Foot.

**Fire Rated Jacket Cable** **Non-Cabled, Stranded Fiber, end emitting**

End emitting fiber optic cable enclosed in a fire-rated outer jacket. Can be used with all stranded fiber fixtures for downlighting, case lighting, step lighting and applications requiring fire-rated cable. Recommended in lengths up to 30'. Allow 3' to 5' service loop per end. Can be cut, harnessed, and ferruled at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Use LB-HK-3, FS-163, or FS-118 tools for ferruling. Minimum bend radius is 10x outer diameter. Priced Per Foot.

**Stranded Fiber****Star Cable** **Non-Cabled, Stranded Fiber, end emitting**

End emitting fiber optic cable in different diameters to create star ceilings or other points of light that require varying degrees of brightness. Recommended for star ceilings in lengths up to 30'. Allow 3' to 5' extra fiber per end. Can be cut and harnessed at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.

**BritePak** **Cabled, stranded fiber, side emitting**

Side emitting stranded optical fiber. Patented cabling method allows maximum light distribution through the clear outer jacket. Recommended in lengths up to 100' for direct view applications, 50' for indirect applications. Both ends should be terminated. Allow 3' to 5' service loop. Can be cut to length at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.

**BritePak Diamond** **Cabled, stranded fiber, side emitting**

BritePak Diamond fiber creates an unbreakable decorative linear look of diamonds along its' length. Available in two different sizes for us low light applications such as isle way lighting. Recommended in lengths up to 100'. Both ends should be terminated. Allow 3' to 5' service loop. Can be cut and harnessed at factory or in field. Use LB-HK-3 or FS-163 tools for harnessing. Minimum bend radius is 4x outer diameter. Priced Per Foot.

**Large Core Fiber - end emitting****EFO FiberJacks Fibers** 

For use with EFO44 and EFO33 Illuminators. Each OptiCore® fiber tail includes a FiberJack connector on one end and a fixture connector (bayonet) on the other end. This method of fiber connection provides the highest light output with an EFO44 or EFO33 Illuminator. No cutting, harnessing, or ferruling required, just plug in and go. Available in standard lengths of from 6' to 25'. Minimum bend radius is 8x inner diameter. Fiber outer jacket is white. Consult factory for custom cutting, assembly, and harnessing of fibers.

**Large Core Fiber - side emitting****TT EdgeGlow - interior** 

Side emitting TT EdgeGlow fiber is for use with EFO44, EFO33 Illuminators and LED e-Luminator.

Its light transmitting core is encased with a layer of Teflon cladding that helps emit light alongside the fiber, creating a beautifully even edge glow. Attenuation (light loss) is typically 1.5% per foot. Minimum bend radius is 12x out Diameter.

Ideal for accent lighting, linear forms, glass block walls and step lighting. **For indoor use only.** Avoid dirt and abrasions on the core and Teflon® cladding. Install fibers in 10° C (50° F) or higher temperature. Recommended Max lengths represent typical length to achieve the most consistent and even light output. Recommended length can vary based on color and illumination source; please consult factory for application guidance. Priced per foot.

Cat. Page	Product Name	Core Diameter		Outer Diameter		- WR Outer Diameter		Recomm. Max Length		Outer Jacket	Directional Beam	DN Price
		inches	mm	inches	mm	inches	mm	Single lit ft	Double lit ft

**TT EdgeGlow - exterior** 

Side emitting TT EdgeGlow fiber is for use with EFO44, EFO33 Illuminators and LED e-Luminator.

FS-EG-xxx-EX **can be used for outdoor applications.** A bondable exterior jacket is clear and flexible, algicides and fungicides resistant and contains UV inhibitors. Fiber is UL94VO fire rated. Attenuation (light loss) is typically 1.5% per foot. Minimum bend radius is 12x out Diameter. Avoid dirt and abrasions on the core and Teflon® cladding. Install fibers in 10° C (50° F) or higher temperature.

For underwater applications -WR can be added which is a tertiary jacket that protects the fiber under water. The illuminator connection should always be in a dry environment, keeping the fiber ends clean and dry.

Recommended Max lengths represent typical length to achieve the most consistent and even light output. Recommended length can vary based on color and illumination source; please consult factory for application guidance. Priced per foot.

**Large Core Fiber - side emitting****RT Direct Glow** 

Side emitting RT DirectGlow fiber is for use with EFO44, EFO33 Illuminators and LED e-Luminator.

**Suitable for indoor and outdoor use.**

Similar to the TT Fiber types a light transmitting core and Teflon cladding create a side emitting large core fiber. The unique reflector technology (RT) makes this type of fiber directional, making it ideal for coves and soffits as well as everywhere where decorative accents are wanted.

Bondable exterior jacket is opaque and flexible, algicides and fungicides resistant and contains UV inhibitors. Fiber is UL94VO fire rated. Attenuation (light loss) is typically 1.5% per foot. Minimum bend radius is 12x out Diameter. Avoid dirt and abrasions on the core and Teflon® cladding. Install fibers in 10° C (50° F) or higher temperature. For underwater applications -WR can be added to protect the fiber under water. The illuminator connection should always be in a dry environment, keeping the fiber ends clean and dry. Recommended Max lengths represent typical length to achieve the most consistent and even light output. Recommended length can vary based on color and illumination source; please consult factory for application guidance. This fiber is driver dependent and requires a lead piece on each lit end. 30' of fiber, double lit, would in effect be 28' RT Fiber with two 1' drivers. Must specify driver length at time of order.

Priced per foot, including driver.

## Color and Effect Wheels

Catalog Page	Part Number	Description	Size	Use	Note	DN Price
100	 PT-01C	4 Color Wheel	2.000" Square	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	Standard colors: Green, Magenta, Cyan, no color Motor is not included with wheels	\$45.03
100	 PT-08C	8 Color Wheel	3.000" Octagon	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	Standard colors: Magenta, Teal, Orange, Yellow, Cyan, Dark Blue, Green, no color. Motor not included	\$109.32
100	 PT-10C	4 Color Wheel	2.800" Square	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	Standard colors: Green, Magenta, Cyan, no color. Motor is not included with wheels	\$55.80
100	 PT-11C	8 Color Wheel	3.250" Octagon	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	Standard colors: Magenta, Teal, Orange, Yellow, Cyan, Dark Blue, Green, no color. Motor not included	\$130.18
100	 AG-04C	4 Color Wheel	3.625" Octagon	EFO-AG	Standard colors: Aqua, Magenta, Green, Yellow, no color. Motor is not included with wheels	\$81.01
100	 SPKWL	Perforated Metal Sparkle Wheel	2.000" Square	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	400 Strands Maximum. Uses the same motor as color wheel if used in conjunction	\$20.11
100	 DIMWL	Perforated Metal Dimming Wheel	3.000" Octagon	FS7L, FS11L, FS12L, 404N, 405N, 601, 602	Cannot be used with a color wheel 20%, 40%, 60% and 100% Transmission	\$50.96
100	 MBF-SOL	Lens; Softening Filter	2.000" Round Dia x 0.125" (H) (51mm x 3mm)	EFO-MBF, EFO-MBF-F, EFO-AAL, EFO-LPS II	Must be ordered with fixtures, for use with EFO-AAL order mounting clip EFO-AAL-FC	\$9.17
100	 MBF-HEX	Louver; Hexagon Filter	2.000" Round Dia x 0.128" (H) (51mm x 3.25mm)	EFO-MBF, EFO-MBF-F, EFO-AAL, EFO-LPS II	Must be ordered with fixtures, for use with EFO-AAL order mounting clip EFO-AAL-FC	\$6.57

## Optical Ports

Catalog Page	Part Number	Description	Fiber Capacity	Illuminator Use	Note	DN Price
101	 A10980	Zinc Optical Port	300 Fibers Max	FS7L, FS11L, FS12L, FS13L, 404N, 405N, 601, 602	Includes compression fitting for fiber cable	\$29.11
101	 C10641-33	Zinc Port Tip Insert for use with Optical Port	400 Fibers Max	FS7L, FS11L, FS12L, FS13L, 404N, 405N, 601, 602	Use with A10980	\$3.19
101	 C10641-45	Zinc Port Tip Insert for use with Optical Port	450 Fibers Max	FS7L, FS11L, FS12L, FS13L, 404N, 405N, 601, 602	Use with A10980	\$3.35
101	 C10643	Zinc Port Tip Insert for use with Optical Port	600 Fibers Max	FS7L, FS11L, FS12L, FS13L, 404N, 405N, 601, 602	Use with A10980	\$19.57
101	 AG-1PK	Port Kit for FSPT Stranded Fiber with Inserts	250-300, 301-400, and 401-500 Fibers	EFO11, EFO-AG	Minimum fiber count is 250 strands	\$66.44
101	 EFO-ZP	Zero Port for Unused Hub	N/A	EFO11, EFO-AG		\$52.17
101	 EFO-ZFJ4	Zero Port for Unused Hub	N/A	EFO44		\$14.98
101	 EFO-ZFJ3	Zero Port for Unused Hub	N/A	EFO33		\$10.24
101	 LE-PORT-12SF		100 or 200		Port Kit for FSPT w/ 2 inserts	\$75.20
101	 LE-PORT-19SF		300, 400 or 500		Port Kit for FSPT w/ 2 inserts	\$75.20
101	 LE-PORT-19LF		Port Tip for large core fiber, attached to fiber		Port for 12mm large core fiber	\$20.00
102	 LE-RJ45-XLR3-ADPTR		3-pin XLR DMX Adapter with RJ45 connection			\$123.08

## Cutting Tools

Catalog Page	Product Name	Description	Details	DN Price
102	 FS-118	Light-Duty Hot Knife with New-Style Shovel Type Blades	60 watt electric hot knife for porting small bundles of fiber into ferrules or small port tips	\$159.49
102	 FS-163	Standard Hot Knife	Butane hot knife for porting bundles of fiber into ferrules or port tips	\$306.25
102	 01-15001-00	Replacement Blade	Shovel-type blades; For FS-163 and FS-118	\$37.20
102	 LB-HK-3	Heavy Duty Hot Knife	Contractor grade electric hot knife for porting bundles of fiber into ferrules or port tips	\$700.00
102	 LB-HK3-BLADE	Replacement Blade	For use with LB-HK-3	\$57.20

## Installation Tools

102	 FS-117	Lens Wrench for LNS Fixture	Used to tighten lens onto lens housing	\$18.21
102	 FS-DP4	Star Ceiling Drill Bit Kit	Set of (4) bits in three sizes for use drilling through gypsum (drywall) or cellulose (ceiling tile) ceilings	\$22.03

## Controls

Catalog Page	Product Name	Description	Details	Illuminator Use	DN Price
102	 CV	Variable Delay on Color	Synchronizes the movement of all color wheels for up to 100 (-SY) illuminators within a network	601, 602, 405N, 404N, FS7L	\$500.00
102	 DX	DMX Control of Dowser (Dimmer Wheel and 8 Color Wheel)	DMX-512 compatible control using 3 DMX channels	601, 602, 405N, 404N, FS7L	\$1,200.00
102	 DXLR	5-PinXLR DMX Dowser Control (Dimmer and 8 Color Wheel)	DMX-512 compatible control using 3 DMX channels with 5-pin XLR cable	601, 602, 405N, 404N, FS7L	\$1,300.00
102	 SM	Synchronization Master	Synchronizes the color changes of up to 40 slave (-SY) illuminators	601, 602, 405N, 404N, FS7L	\$420.00
102	 SY	Synchronization Slave	Allows an illuminator to operate on a -CV or -SM network	601, 602, 405N, 404N, FS7L	\$400.00
102	 DR	Dimmable Ready	For wall-box rheostat dimmers, electronic transformer	FS13L, FS12L, FS11L	\$40.00
102	 DRC	Dimmable Ready	For architectural and commercial dimmers, electronic transformer	FS13L, FS12L, FS11L	\$40.00

## Illuminator Mounting Accessories

Catalog Page	Product Name	Description	Details	Illuminator Use	DN Price
103	 FS-TVK2	Ventilation Kit	36" long, flexible duct, rigid vent	FS11L, FS12L, FS13L	\$322.81
103	 FS-WB	Wall Mount Bracket	0.76" (W) x 9.00" (L) x 7.70" (H)	404N vertical wall,w/Lag Bolts	\$229.50
103	 EFO-CR	Caddy Rails, Set of 2	2.00" (W) x 24.00" (L) x 2.13" (H)	EFO illuminators (except EFO-AG)	\$44.80
103	 AD-WM-KIT	Wall Mount Kit	7.16" (W) x 16.63" (L) x 12.38" (H)	EFO illuminators (except EFO-AG)	\$173.92
103	 LE-SLED	Mounting Sled	16.00" (W) x 10.00" (L) x 2.00" (H)	LESI, LESX, LEFI, LEFX	\$60.00
103	 LE-SLED-CR	Mounting Sled with caddy rails	Sled:16.0"(W) x 10.0"(L) x 2.0"(H) Rails:2.0"(W)x 24.0"(L)x 2.13"(H)	LESI, LESX, LEFI, LEFX	\$100.00

## Fiber Mounting Accessories

Catalog Page	Product Name	Description	Details	Fiber use	DN Price
103	 TRK-5/8	PVC U-Track Extrusion	0.63" Square x 6' Long (16mm x 1.83m)	BPAK-150 cable in straight or slightly curved lines	\$12.57
103	 TRK-U1/2	PVC U-Track Extrusion	0.59" Square x 6' Long (15mm x 1.83m)	BPAK-75 & BPAK-100 straight; slightly curved lines	\$8.60
103	 TRK-U3/8	PVC U-Track Extrusion	0.46" Square x 6' Long (11.7mm x 1.83m)	BPAK-40 & BPAK-50 straight; slightly curved lines	\$6.94
103	 HI-102	PVC Clips	0.48" x 0.84" x 0.38" (12 x 21 x 10mm)	BPAK-15 in curved lines, securing very small FSPT	\$0.35
103	 HI-103	PVC Clips	0.48" x 1" x 0.48" (12 x 25 x 12mm)	BPAK-40 AND BPAK-50 in curved lines, small FSPT	\$0.35
103	 HI-104	PVC Clips	0.48" x 1.2" x 0.62" (12 x 30 x 16mm)	BPAK-75 and BPAK-100 in curved lines, medium FSPT	\$0.87
103	 HI-105	PVC Clips	0.48" x 1.2" x 0.68" (12 x 30 x 17mm)	BPAK-150 in curved lines, securing large FSPT	\$0.58
103	 FS-131	Double-sided Tape	5/16" (W) x 165' (L) (8mm x 50m)	TEMPORARY for side-emitting fiber, use with FS-136	\$33.97
103	 FS-136	Silicone Adhesive	10.3oz Tube (300 ml)	Approved for adhering side-emitting fibers and track	\$22.56
103	FS-112	Epoxy, 2-Part	1.7 fl.oz (50 ml), DP-100 clear	Use with FS-113, FS-114	\$37.98
103	FS-113	Epoxy Mixing Nozzle	0.209" (L) (5.3 mm), 12 in bag	Use with FS-112, FS-114	\$2.69
103	FS-114	Epoxy Applicator Gun	2:1 mixing gun	Use with FS-112, FS-113	\$190.22
103	FS-115	Epoxy Kit		Adhering fibers and ferrules, disposable kit	\$29.54

## Fixture Mounting Accessories

Catalog Page	Product Name	Description	Details	Fixture Use	DN Price
104	 EFO-BFB	Butterfly Brackets, Set of 2	5.40" (W) x 3.13" (L) x 2.26" (H)	Alternate mounting for fixtures	\$18.13
104	 EFO-BH	Flat Bar Hanger	25.00" (L) x 0.50" (H)	Alternate mounting method for EFO-MBF, -FAW, -F, and -LPS	\$8.18
104	 EFO-MC	Clips for Flat Bar Hanger	1.187" (W) x 1.250" (L) x 0.367" (H)	Use with EFO-BH flat bar hangers	\$21.98
104	 EFO-LAS	Lift and Shift	9.57" (W) x 23.75" (L) x 3.36" (H)	Mounting for MBF type fixtures for T-Grid ceilings	\$54.92
104	 EFO-AAL-FC	Spring Retainer	2.120" (OD)	EFO Fixtures to retain filters on lens	\$7.10
104	 EFO-CR	Caddy Rails, Set of 2	2.00" (W) x 24.00" (L) x 2.13" (H)	EFO-MBF, -FAW, -F, and -LPS in T-bar ceilings	\$44.80
104	 FS-910	Ground Mounting Stake	6 inch (150mm) black plastic stake	FS-210 and FS-310 into soil or similar materials	\$45.52
104	 FS-912	Extension for FS-210	6 inch (150mm) black plastic ball joints	Length extension for FS-210	\$13.07
104	 LB-MB-CL	Mounting Bracket	1.25" Square (31.75mm)	Lightly Expressed LightBars; adhesive strip included	\$7.50
104	 LB-MB-BL	Mounting Bracket	1.25" Square (31.75mm)	Lightly Expressed LightBars; adhesive strip included	\$7.50
104	 CRE2302	Spring Adaptor	1.201" (OD) x 3.150" (Spring H)	CRE Fixtures without spring clips	\$31.90
104	 CRE1211	Paver Installation Tube, Small	1.299" (OD) x 4.724" (H)	Outdoor fixtures, small sizes	\$10.33
104	 CRE1212	Paver Installation Tube, Medium	1.677" (OD) x 4.724" (H)	Outdoor fixtures, medium sizes	\$10.33
104	 CRE1213	Paver Installation Tube, Large	2.500" (OD) x 4.331" (H)	Outdoor fixtures, large sizes	\$20.80
104	 LBM061008201	Locking Nut, Bronze	M-22 thread nut	LBM06100820	\$38.00
104	 LBM061008191	Locking Nut, V4A Stainless	M-22 thread nut	LBM06100819	\$38.00
104	 LEDDL-ARM-24	DockLight Arm	24", Single Strut	LEDDL-xxx-xxx-xx	\$140.00
104	 LEDDL-ARM-42	DockLight Arm	42", Single Strut	LEDDL-xxx-xxx-xx	\$170.00
104	 LEDDL-ARM-60	DockLight Arm	60", Single Strut	LEDDL-xxx-xxx-xx	\$190.00
104	 LEDDL-YOKE-SY-HB	Replacement Yoke	Arm, Hex Bolt	LEDDL-xxx-xxx-xx	\$30.00
104	 LEDDL-YOKE-SY-TS	Replacement Yoke	Arm, Thumb Screw	LEDDL-xxx-xxx-xx	\$30.00
104	 LEDDL-YOKE-TY-HB	Replacement Yoke	Trunnion, Hex Bolt	LEDDL-xxx-xxx-xx	\$30.00
104	 LEDDL-YOKE-TY-TS	Replacement Yoke	Trunnion, Thumb Screw	LEDDL-xxx-xxx-xx	\$30.00
104	 LEDLS-PHTSNR	Photo Sensor	Photo Sensor	LEDLS-xxx-xxx-xx	\$150.00
104	 LEDLS-SLPFTTR-BLT	Slip Fitter	Slip Fitter, 3-1/2 bolt	LEDLS-xxx-xxx-xx	\$88.00
104	 LEDLS-SLPFTTR-NPT	Slip Fitter	Slip Fitter, 1/2 nipple	LEDLS-xxx-xxx-xx	\$60.00
104	 EFO-LEDGM-AM	GlobeLight Mount	Angle mount	EFO-LEDGS/LG	\$60.00
104	 EFO-LEDGM-FM	GlobeLight Mount	Flat mount	EFO-LEDGS/LG	\$30.00
104	 EFO-LEDGM-FSM	GlobeLight Mount	Flat start mount	EFO-LEDGS/LG	\$40.00

## POLICIES: Order Processing

### BEFORE AN ORDER CAN BE RELEASED TO MANUFACTURING:

1. The order must be sent via fax, e-mail or mailed by the representative agency with rep cover PO.
2. The original purchase order from the distributor or "bill to" must also be faxed or e-mailed. **Dollar amount on customer PO must match PO from representative, and a job name must be listed.**
3. When an order does not meet the minimum required order amount of \$100.00, a \$25.00 service charge is to be added to the order, except for replacement parts (lamps, c/w motor, ballast, etc.).
4. When an order is from a new distributor, and dollar amount is \$2000.00 or more, the customer may apply for credit terms. A signed credit application should be sent with the order. Allow 5-7 working days for credit approval processing. Orders from new customers under \$2000.00 must be pre-paid at the time of order placement via check, Visa, Master Card; no COD'S.
5. When an order must ship the same day the purchase order was received, a \$50.00 same day rush charge must be added to the order. **Same day shipments apply to stocked items only.** (Illuminators are not stock items) This charge is in addition to the equipment prices and freight. The order must be received by 10:00 a.m. PST of that same shipping day, with a follow-up call for confirmation.
6. All custom and built to specification orders require a 50% deposit. This includes but is not limited to: the Lightly Expressed and European Design fixture series, custom fiber optic harnesses, non-catalogued items, and projects requiring on-site factory services or installation.
7. The purchase order must reference a job name, specifier, job location, Fiberstars' estimate/quote number and terms.
8. If distributor is already set up with open credit, standard terms of Net 30 days must be indicated on the purchase order.
9. **ACCEPTABLE TERMS OF SALE: Factory, Ex-works, Origin or Shipping Point.** Applicable sale term must be clearly indicated on customer purchase order.
10. **STANDARD FREIGHT TERMS: Customer purchase order must reflect our standard freight terms,** which are collect or pre-paid & add. When freight term is "collect", a designated carrier and account number must be provided w/ order.
11. **Customers in the states of CA, NY, OH, TX, VA, & WA must have a Tax Resale Certificate** on file or sales tax will be charged.
12. To ensure the fastest delivery, all pertinent information should be included. Lack of information will delay the order process.

### PRODUCT SPECIFICATIONS:

1. When listing individual part numbers, always make sure that every part number is complete. For example, when ordering any illuminator, specify the following:
  - a. Type of lamp for 404N and 405N only – 3000°K or 4000°K
  - b. Speed of color wheel motor (1.0 or 3.6 RPM)
  - c. Color wheel selection (for C1, C4 or C8) and the sequence of colors, start color for synchronized units
  - d. Voltage/Hz (120V, 60Hz, etc)
  - e. Options (synchronization, variable delay, dimmable ready, DMX, etc)
2. When ordering fiber optic cable or track, the quantity should be indicated as a unit of measure: fiber footage / # of pieces of track. (If more than one cut is required on fiber length, a cutting charge per cut will be incurred).
3. Make sure all installation materials are included in the order such as silicone, epoxy, ferrules double-sided tape, etc.
4. Always remember to add a hot knife to all new orders. It is a required and reusable tool for installation (Part number FS-118, FS-163, or LB-HK3).
5. Please indicate on the customer's PO request for partial shipment of material.

## POLICIES: Terms and Conditions

### Credit

All new accounts must have a credit application and state resale card (CA, NY, OH, TX, VA, & WA only) on file before an order can be processed. An initial order must be over \$2,000.00 US before an open account status can be considered. Open account status for domestic orders is extended only to companies that are: 1) medium or large size, 2) established, and 3) have a good credit history. Unless credit is established, all sales are Check with Order, approved credit card only, no C.O.D's.

### Terms

Payment terms are Net 30 days from shipping date. **All custom orders require a 50% deposit.** Late charges of 1-1/2% per month will be added to all past due invoices and represent the deferred price of the item purchased. Energy Focus, Inc. /Fiberstars reserves the right to hold any orders if an account has open invoices which extend beyond payment terms.

**Orders:** Orders will only be accepted with a written purchase order signed by an authorized agent of the issuing customer.

**Minimum Billing:** Any order less than \$100.00 will incur a \$25.00 additional processing charge.

### Cancellation

If a sales order is cancelled after the order has already passed credit and is in production, there will be a \$100.00 cancellation processing fee as well as up to a 50% restocking charge.

### Freight

**All prices are FOB Factory, NO Freight Allowed.** Unless otherwise specified, method of shipment will be determined by Fiberstars. Orders requesting shipment within 24 hours will incur a \$50.00 additional processing charge. All estimates of freight costs before actual shipment are only estimates and Energy Focus, Inc. /Fiberstars is not liable for the difference between an estimate and the actual cost of the shipment. Purchase orders must indicate "FOB Factory, Ex-works or Origin" and "Collect or Prepay & Add." Any special shipping instructions (i.e. Overnight) must be indicated on purchase order, and a shipping account number must be provided.

**Loss or Damage:** The customer should take up loss or Damage Loss of damage of shipments with the customer's local agent of the shipping firm. We will provide a copy of the original bill of lading and can provide assistance in filing your claim with the carrier.

**Limited Warranty:** Energy Focus, Inc. /Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus, Inc. /Fiberstars. Energy Focus, Inc. /Fiberstars warrants its illuminators, hardware and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to be the specifications outline by Energy Focus, Inc. /Fiberstars. In the event of a defect in material or workmanship during the warranty period, Energy Focus, Inc. /Fiberstars will repair or replace (at its option) your lighting system component, under the conditions of the warranty. See Limited Warranty Policies sheet for details.

### Returns

All returns require a Return Goods Authorization Number (RGA #). Energy Focus, Inc. /Fiberstars will not be responsible for product returned without an RGA #. Call Fiberstar Customer Sgtxleg Department at (888) 704-2292, before returning any goods. A minimum restocking charge of 50% will be made on standard products returned in their factory sealed shipping cartons within three months of original shipping date. Customer is responsible for shipping both ways. Custom products, including fiber optic cable cut to length, are not returnable. Refer to Returned Goods Authorization Policies sheet for further details.

**Taxes:** Any Federal or State Excise Tax for which we may be liable on any sale will be charged to and paid by the buyer. Customer is responsible for furnishing resale certificate.

### Payment of Invoices

Remit to Energy Focus, Inc, Dept CH 17516, Palatine, IL 60055-7516

For payment related questions you can also contact the corporate office Account Receivables Department

## POLICIES: Returned Goods Authorizations

### Obtain an RGA Number

All returns require a Return Goods Authorization Number (RGA #). Call Fiberstars; Customer Ugtxleg Department at (888) 704-2292 to obtain an RGA number before returning any products. Energy Focus, Inc./ Fiberstars will not be responsible for product returned without an RGA number.

### Expiration Date

RGA numbers are good for a period of 90 days from issuance.

### Minimum Restocking Charge

A minimum restocking charge of 50% will be made on standard products returned in their factory sealed shipping cartons within three months (90 Days) of original shipping date. Products are not returnable for credit or exchange after 90 days.

Custom products including fiber tubing cut to length, color wheels, products that have opened cartons and/or products that have been used are not returnable.

### Shipping

Energy Focus Inc./ Fiberstars is not responsible for shipping charges incurred when returning product to or from the factory. When returning any products, the RGA number must be clearly marked on each carton. Products should be returned to <Hdgtuctu"Tgegkxkpi =E IQ"Nwo gp{ vg="96"Kqp="Hqjy kniTcpej .EC"; 4832="Vgn"; 6; /: 4; /7422"

### Limited Warranty

Energy Focus Inc./ Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. Energy Focus Inc./ Fiberstars warrants its illuminators, hardware and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service for a period of **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. In the event of a defect in material of workmanship during the warranty period, Energy Focus Inc./ Fiberstars will repair or replace (at its option) your lighting system component, under the conditions of the warranty. See Limited Warranty Policies sheet for details.

### Reimbursed Costs

Energy Focus Inc./ Fiberstars is not responsible for costs incurred when removing product to be returned for repair or for reinstallation costs after repair.

## **POLICIES: Limited Warranty**

Energy Focus Inc./ Fiberstars warrants its fiber optic cable to be free from defects in material and/or workmanship, under normal use and service, for a period to **one year** from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus Inc./ Fiberstars. Energy Focus Inc./ Fiberstars warrants its illuminators, hardware, and fixtures *excluding the lamp* to be free from defects in material and/or workmanship, under normal use and service, for a period of **one year** from the date of original purchase. A Lighting System is defined as an Energy Focus Inc./ Fiberstars illuminator coupled with Energy Focus Inc./ Fiberstars. fiber optic cable to deliver fiber optic lighting. The use of an Energy Focus Inc./ Fiberstars component (illuminator or fiber optic cable) with a non-Energy Focus Inc./ Fiberstars component voids all warranties. Energy Focus Inc./ Fiberstars components are designed to be part of an Energy Focus Inc./ Fiberstars system. Their use with other components will affect their performance and therefore will not be under warranty.

In the event of a defect in material or workmanship during the warranty period, Energy Focus Inc./ Fiberstars will repair or replace (at its option) the component (s) under the conditions of this Warranty. Energy Focus Inc./ Fiberstars will do so at its expense for the cost of materials but not for shipping. **THIS REMEDY IS THE SOLE AND EXCLUSIVE REMEDY FOR ANY AND ALL CLAIMS RELATING TO ANY BREACH OF WARRANTY BY ENERGY FOCUS INC. / FIBERSTARS**

### **LIMITATIONS, EXCLUSIONS AND OTHER RIGHTS:**

- A. EXCEPT AS PROVIDED HEREIN, ENERGY FOCUS, INC. / FIBERSTARS MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, AND ALL SUCH WARRANTIES ARE EXPRESSLY DISCLAIMED. Some states do not allow the exclusion of an implied warranty, so the above exclusion may not apply to you.
- B. IN NO EVENT SHALL ENERGY FOCUS, INC. / FIBERSTARS BE LIABLE FOR INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, EVEN IF ENERGY FOCUS, INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. THIS DISCLAIMER APPLIES DURING AND AFTER THE WARRANTY PERIOD. Some states do not allow the exclusion or limitation of indirect, incidental or consequential damages, so the above limitation or exclusion may not apply to you.
- C. ENERGY FOCUS, INC. / FIBERSTARS is not responsible for defects or malfunctions in and/or damage to Lighting Systems where a sale is specifically made without warranty. In such sales, the disclaimers of warranty and liability, set forth above, shall continue to apply.
- D. This Warranty covers normal consumer use and does not cover damage which occurs in shipment or failure with results from alteration, theft, misuse, abuse, abnormal use, negligent installation, improper maintenance or where adequate care has not been taken to prevent ice or snow damage to the Lighting System.
- E. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

If you discover a defect or malfunction during the period to which this WARRANTY applies, write or phone Fiberstars for information on receiving warranty service. Please address your inquiries to:

Fiberstars, An Energy Focus Company  
Warranty Service/Customer Support, Commercial Lighting Division  
6678 Owens Drive, Suite 105, Pleasanton, CA 94588  
Phone: (888)-704-2276 Fax: (888) 704-2292

**ENERGY FOCUS LIMITED WARRANTY ON LED PRODUCTS**

Energy Focus Inc. warrants its LED products to be free from defects in material and/or workmanship, under normal use and service for the period identified within this warranty from the date of original purchase, provided the product is installed to the specifications outlined by Energy Focus.

In the event of a defect in material or workmanship during the warranty period, Energy Focus Inc. will repair or replace (at its option) the component(s) under the conditions of this warranty. Energy Focus Inc. will do so at its expense for the cost of materials but not for shipping. **THIS REMEDY IS THE SOLE AND EXCLUSIVE REMEDY FOR ANY AND ALL CLAIMS RELATING TO ANY BREACH OF WARRANTY BY ENERGY FOCUS INC.**

**LIMITATIONS, EXCLUSIONS AND OTHER RIGHTS:**

- A. Except as provided herein, Energy Focus Inc. makes no other warranties, express or implied, including but not limited to the implied warranties of merchantability or fitness for a particular purpose, and all such warranties are expressly disclaimed. Some states do not allow the exclusion of an implied warranty, so the above exclusion may not apply to you.
- B. In no event shall Energy Focus Inc. be liable for indirect, incidental, or consequential damages, even if Energy Focus Inc. has been advised of the possibility of such damage. This disclaimer applies during and after the warranty period. Some states do not allow for the exclusion or limitation of indirect, incidental or consequential damages, so the above limitation or exclusion may not apply to you.
- C. Energy Focus Inc. is not responsible for defects or malfunctions in and/or to the product where a sale is specifically made without warranty. In such sales, the disclaimers of warranty and liability, set forth above, shall continue to apply.
- D. This warranty covers normal consumer use and does not cover damages which occurs in shipment or failure with results from alteration, accident, theft, misuse, abuse, abnormal use, negligent installation, improper maintenance or where adequate care has not been taken to prevent damage to the product.
- E. This warranty gives you specific legal rights, and you may have other rights which vary from state to state.

If you discover a defect or malfunction during the period to which this warranty applies, write or call Energy Focus Inc. for information on receiving warranty service. Please address your inquiries to:

Fiberstars, An Energy Focus Company Warranty Service/Customer Support, Commercial Lighting Division 6678 Owens Drive, Suite 105, Pleasanton, CA 94588 Phone: (888)-704-2276 Fax: (888) 704-2292

**LED Docklight, LED LandScape Lights and LED GlobeLights**

<b>WARRANTY COVERAGES (1) &amp; (2)</b>	
<b>PERIOD</b>	<b>COMPONENT</b>
Year-1	100% Component Coverage
Year-2	75% Component Coverage
Year-3	50% Component Coverage

(1) Warranty Coverage percent can be used toward a rebate on new EFOI product(s)

(2) Warranty pertains to product failure of zero light output

## Technical Information: GROUP RE-LAMPING

A group re-lamping program is extremely important to ensure the integrity of fiber optic lighting projects.

- **In an end-emitting application (i.e. downlights) group re-lamping is crucial to ensure consistent light output from downlights in an area.** Lamps must be replaced in all illuminators at the same time. If the lamps are replaced on an “as needed” basis, some groups of downlights will appear brighter and/or different color than other groups of downlights.
- **The situation is even more noticeable with a side-emitting application (i.e. neon replacement).** For example, if you have a lamp failure in one illuminator on a run of fiber that is fed from two illuminators and only the failed lamp is replaced; your fiber run could be noticeably brighter at one end than at the other. To avoid this situation, group re-lamping is the solution.
- **Group re-lamping should take place at 80% of manufacturer’s rated lamp life.** A percentage of the working lamps replaced should be kept. These lamps would be used for any early failure and should last until the next scheduled re-lamping.
- **If lamps are burned beyond rated life, light output diminishes** while energy consumption and risk of rupture increases. Metal halide lamps are constructed of an outer bulb with an internal arc tube made of quartz. The arc tube operates under high pressure at very high temperatures. The arc tube and the outer bulb may unexpectedly rupture due to internal causes or external factors.
- **Continuous operation can lead to unexpected lamp rupture.** Since Energy Focus Inc./ Fiberstars’ EFO illuminators use metal halide lamps, we recommend that in continuously operating systems (24 hours/day, 7 days/week), turn lamps (illuminators) off once per day for at least one hour. Failure to comply increases the chance of rupture. Please include this recommendation on all projects that are specified with Energy Focus Inc. / Fiberstars fiber optic lighting systems.
- **Without a re-lamping program, projects have a tendency to deteriorate.** Low light and/or uneven output will result in complaints, which will lead to customer service calls. The bottom line is that Energy Focus Inc. / Fiberstars and fiber optic lighting in general will be viewed in negative light.

Please encourage your specifiers and end-users to utilize a group re-lamping program. This will keep all Energy Focus Inc. / Fiberstars projects working to their maximum potential, which will keep the customer satisfied.

## **TROUBLESHOOTING GUIDE**

### **Fiber optic cable not as bright as when first installed .....**

- Check lamp and re-lamp if necessary
- Inspect fiber cut at port. If uneven, pulled-back, or melted/burnt, fiber port must be re-terminated.

### **Fiber optic cable has melted .....**

- Verify that illuminator is installed to specifications in installation manual, including appropriate ventilation.
- Be sure fiber port is cleaned before re-porting.
- Recut fiber optic cable at least 8-10 inches behind melted fiber following instructions in installation manual.

### **Illuminator will not come on .....**

- Check wiring for input voltage.
- Check circuit breaker.
- If a lamp is having trouble starting, it is near the end of its life. Replace lamp.
- Make sure lid is closed completely in order to make contact with the limiting switch.

### **Illuminators will not sync with each other (UO 5 only)**

- Check low voltage wiring. Make sure no wires are crossed or shorted.
- 9V battery test: take the battery to the low voltage wires out of the back of the slave illuminator. Connect the black wire to the negative side of battery. Connect the red and green wire to the positive side of battery. Apply power to the illuminator and the color wheel should rotate. If it does not, contact factory. (This test does not work with master illuminator.)

### **Illuminator comes on for 5-15 minutes, then turns off .....**

- Check lamp, it may be at the end of its life. Replace lamp.
- Illuminator may be overheating, check ventilation and correct if necessary.

### **Color wheel will not rotate .....**

- Check color wheel to insure the progress is not impeded.
- Check wiring to switch to insure a good electrical path is present.

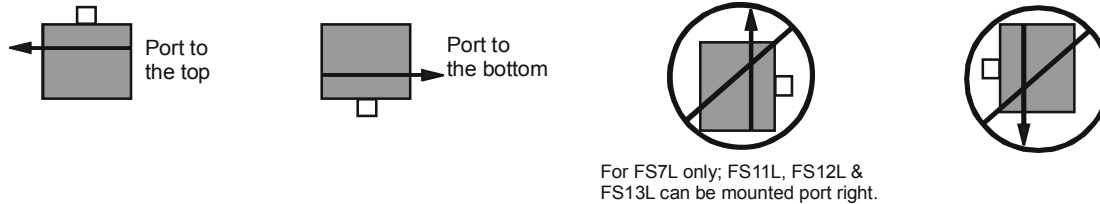

## TFO Illuminator Mounting

### All TFO Illuminators

- Minimum clearance of 24" (on all sides except bottom) and must have sufficient ventilation.
- Must be accessible for relamping and maintenance.
- All illuminators can be mounted horizontally on a flat surface.
- Some can be mounted vertically in the recommended positions below (arrow indicates air flow).
- FS1L and 602 can only be mounted horizontally on a flat surface.

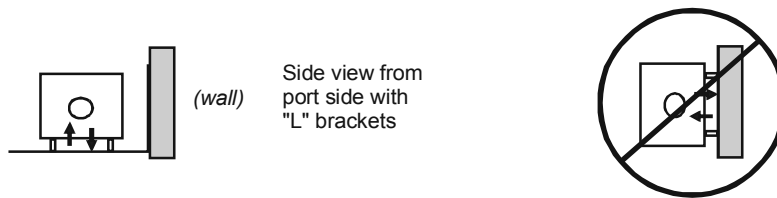

### FS7L, FS11L, FS12L, FS13L Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

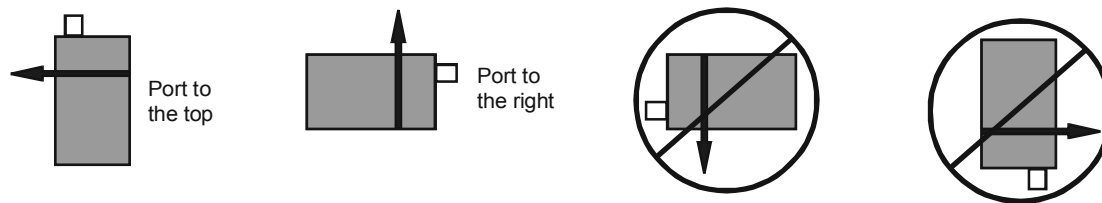

### 404N Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) horizontally to a vertical surface (refer to diagrams).

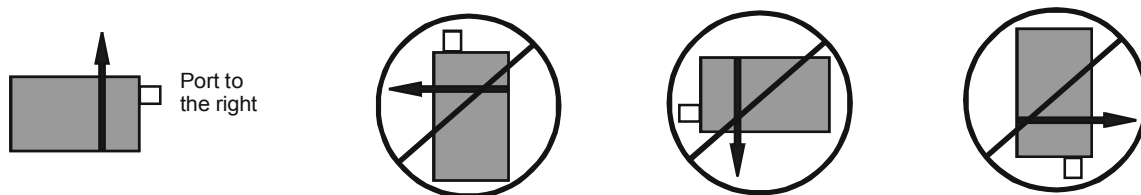

### 405N Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

### 601 Illuminators

Mount illuminators either: 1) horizontally on a flat surface, or 2) vertically on a wall (refer to diagrams).

# TFO Porting Instructions

## 1. Pre Heat the Hot Knife

Plug in or ignite the hot knife (#FS-118, FS-163, or LB-HK-3). Hold or prop the knife vertically so the blade tip is up. Allow it to heat for 8 - 10 minutes.

## 2. Assemble the Optical Port

### Zinc Port

Screw the compression fitting onto the back of the zinc port.

Select a ferrule tip and slide it into the port, using the keyway to align.

Small Ferrule = up to 100 fibers  
Medium Ferrule = up to 200 fibers  
Large Ferrule = up to 300 fibers  
XLarge Ferrule Options: 400, 450, 600

(Special applications. See illuminator sections.)

### Plastic Port

Select a ferrule tip and slide it into the port, using the keyway to align.

Small Ferrule = up to 100 fibers  
Midsize Ferrule = up to 150 fibers  
Medium Ferrule = up to 200 fibers  
Large Ferrule = up to 300 fibers

Slide cutting cap over the ferrule.

If using 501 port, slide the black boot over the fiber tubing so the opening faces the ends of the fiber tubing.

### Aluminum Port

Select a ferrule tip and slide it into the port. Secure it with the setscrew.

Small Ferrule = up to 100 fibers  
Medium Ferrule = up to 211 fibers  
Large Ferrule = up to 300 fibers

## 3. Strip Off the Outer Tubing

About 9" from each end, score around the circumference of the tubing so that it cuts the tubing but not the fibers.

*Important: do not nick or cut the fibers.* Pull off the outer tubing.

If using BritePak® or SuperStars® fiber optic cable, unwind the mylar wrap and cut off. Loosen the fibers thoroughly from the cabling by rubbing/rolling the fibers between your palms so that they are loose and straight.

## 4. Insert the Fibers into the Optical Port

Push fibers through the large end of the optical port. Rotate the port to help feed the fibers through easier. The edges of the outer tubing should wedge against the inside of the port where it begins to narrow. The fibers should extend 3" - 4" beyond the ferrule. *Caution: do not break or crimp fibers.*

## 5. Clamp the Fiber Tubing

### Zinc Port

Insert dummy plug if needed to take up extra space. Tighten the compression fitting to apply pressure on the tubing to hold it in place.

### Plastic Port

Partially screw down clamp. Use the dummy plugs or spacers to take up extra space. Tighten the screws so the clamp applies pressure on the tubing to hold it in place.

### Aluminum Port

Partially screw down clamp. Use the dummy plugs to take up extra space. Tighten the screws so the clamp applies pressure on the tubing to hold it in place.

## 6. Stuff the Ferrule Tip

With scissors or Fiskars®, cut off about 2" of loose fibers. Stuff the ferrule tip around the edge with these fibers until no space remains between the fibers. This will help prevent the fibers from pulling back or melting.

## 7. Cut the Fibers with the Hot Knife

**Note: This step is critical.**

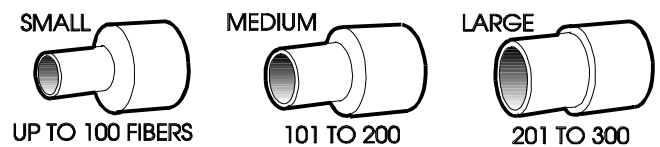

Place the preheated hot knife blade with the cutting edge against the ferrule tip or cutting cap. The top of the blade should tilt slightly away, about 2°. With downward pressure, cut through the fiber bundle. As you cut, rotate the port slowly. Do not saw back and forth. When properly heated, the hot knife should take 10 - 15 seconds to cut the fibers. The fiber ends should look clean and flat. Uneven cuts, debris, or the oil from your fingers will diminish the light output. Once cut, do not touch the fiber ends with your fingers.

(For plastic port, remove the cutting cap.)

## 8. Insert the Finished Optical Port into the Illuminator

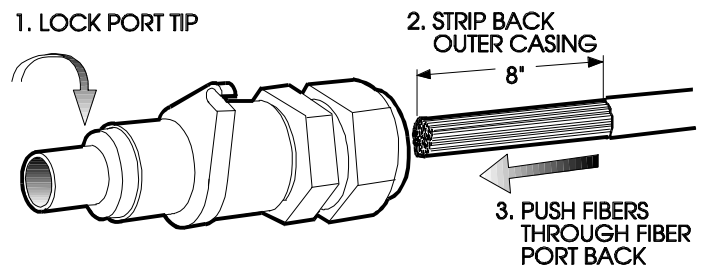

# PORT ASSEMBLY/FIBER TERMINATION

**A) Insure that the total fiber count of all fiber tubings is 300 or less. If you have more than 300 individual fibers, you will need a second illuminator.**

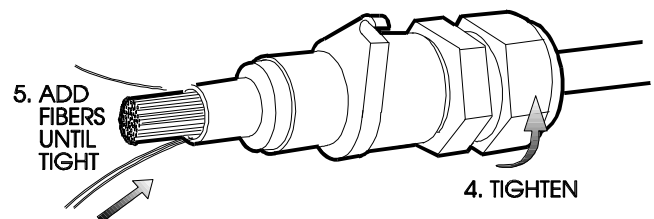

**B) Insert the proper size tip into the port and twist with pliers to lock (fig. 1).**

**C) Strip back all fiber casings no less than 8 inches (fig. 2). Take care not to nick the fibers.**

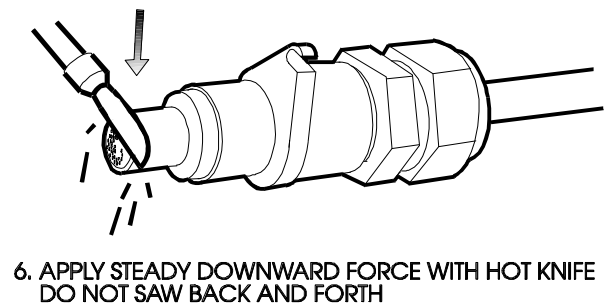

**D) Insert the bare fibers into the port so ALL fibers protrude past the port tip (fig 3). Be sure the outer jacket doesn't insert further than the grey compression fitting. Tighten the port compression nut down on the fiber casing (fig 4).**

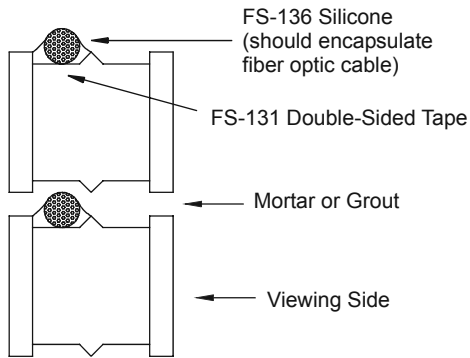

**E) IMPORTANT: If the port tip is not completely full, insert short pieces of individual fibers into the tip until it is completely full (fig. 5). This will keep the lit fibers perpendicular to the lamp, and prevent the fibers from overheating.**

**F) Heat an electric or butane hot knife so it is hot enough to melt the fibers. Apply firm downward pressure on the fibers, with the blade touching the port tip at a slight angle (fig 6). Do not saw at the fibers. Allow the heat of the knife to slowly trim the fibers. Ease the pressure as the knife almost completes the cut. Place the hot knife in a safe place to cool.**

## Glass Block Installation

*Note: Diameter of fiber must accommodate glass block clearance.*

### Mortar Joint Method (Between Mortar Joints)

Mount fiber optic cable directly between glass blocks. Use glass block without edge coating. If you do select a glass block that has edge coating, it must be removed to allow light transmission.

Tack fiber optic cable to the top of the row of glass block with hot glue to hold it in place and create a straight line along the top of the block. Run a heavy bead of Fiberstars silicone adhesive (FS-136) on both sides of fiber optic cable. Apply mortar to joint and set the block.

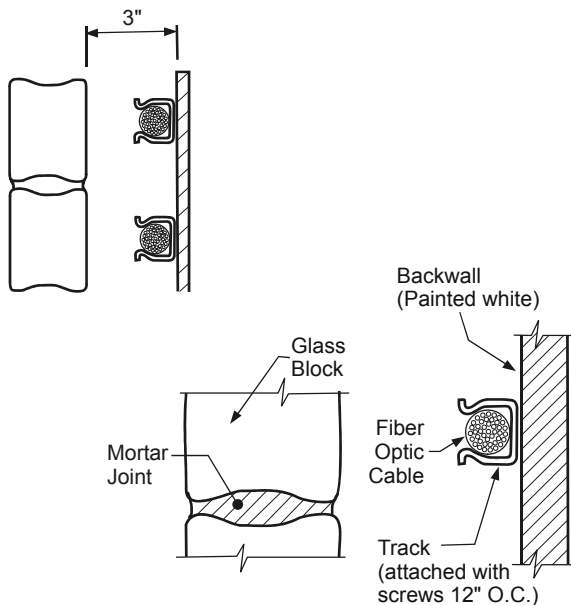

On the ends of the glass block wall, a channel will have to be created to hide the fiber optic cable where it passes from course to course. This channel must be a minimum of 2" deep to avoid kinking the fiber optic cable.

### Backlit Method (Behind Glass Blocks)

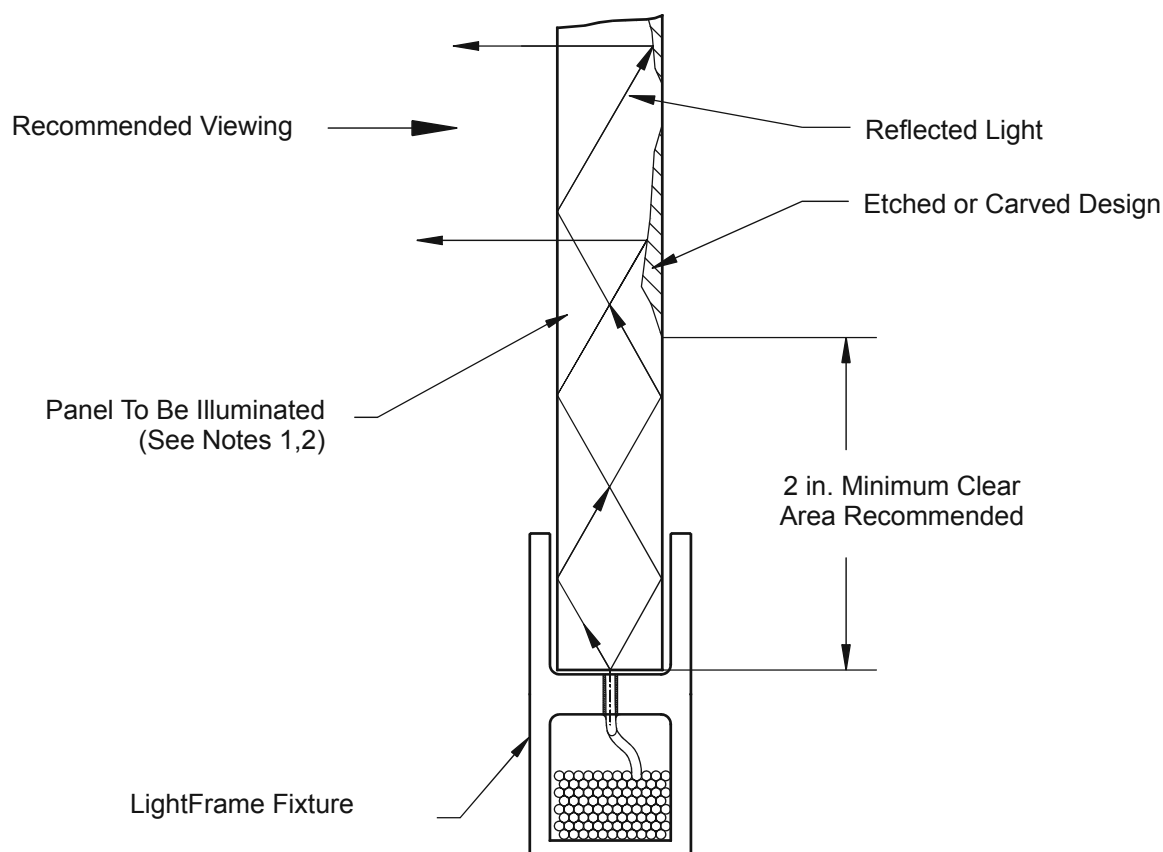

Paint background white.

Install track and fiber optic cable 3" - 6" behind glass blocks on white background at the midpoint of each course of glass block. Using adhesive and screws, install track as straight as possible.

Run a bead of adhesive inside the track to help keep the fiber optic cable in place. Press the fiber optic cable into the track, being careful not to kink or bend the fiber optic cable more than a 2" bend radius. Do not use cap.

## Edge Lit Glass Installation

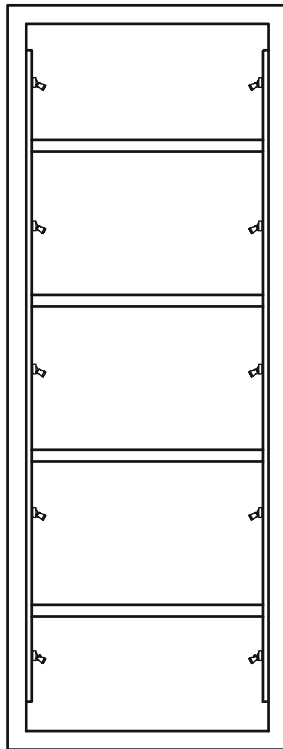

**Section View Thru  
Fixture & Panel**

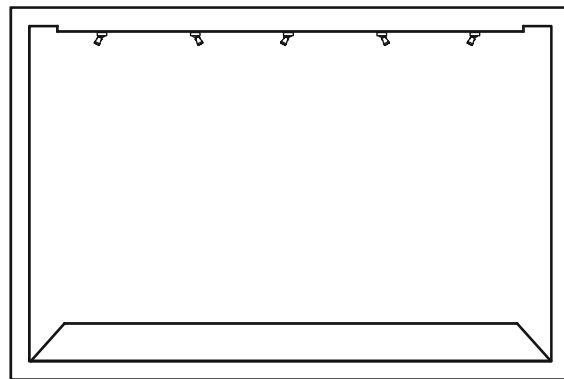

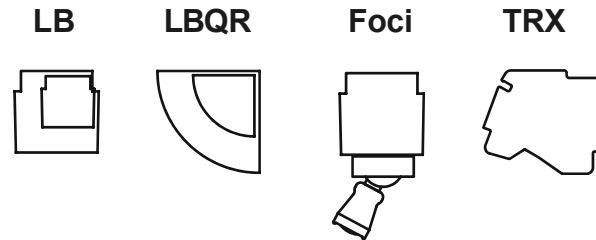

**NOTES:**

1. **(Very Important)** Glass shall support fixture--fixture cannot support glass
2. Glass edge in contact with LightFrame fixtures must be polished or clean break.
3. Acrylic edge in contact with LightFrame fixtures must be polished clear.
4. Install illuminator in vented location within 30 feet of illuminated panel.

# Display Case Installation

**Tall Case**  
Vertical Fixture Orientation (Sides)

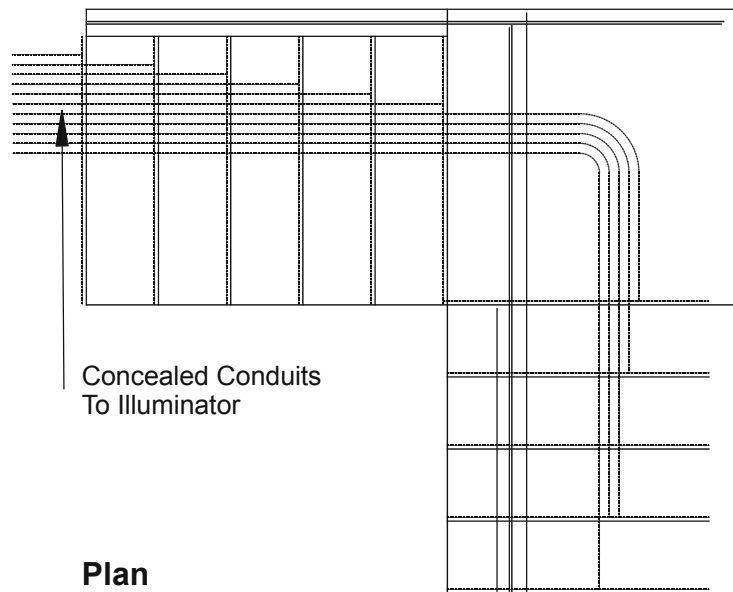

**Long Case**  
Horizontal Fixture Orientation (Top)

## NOTES:

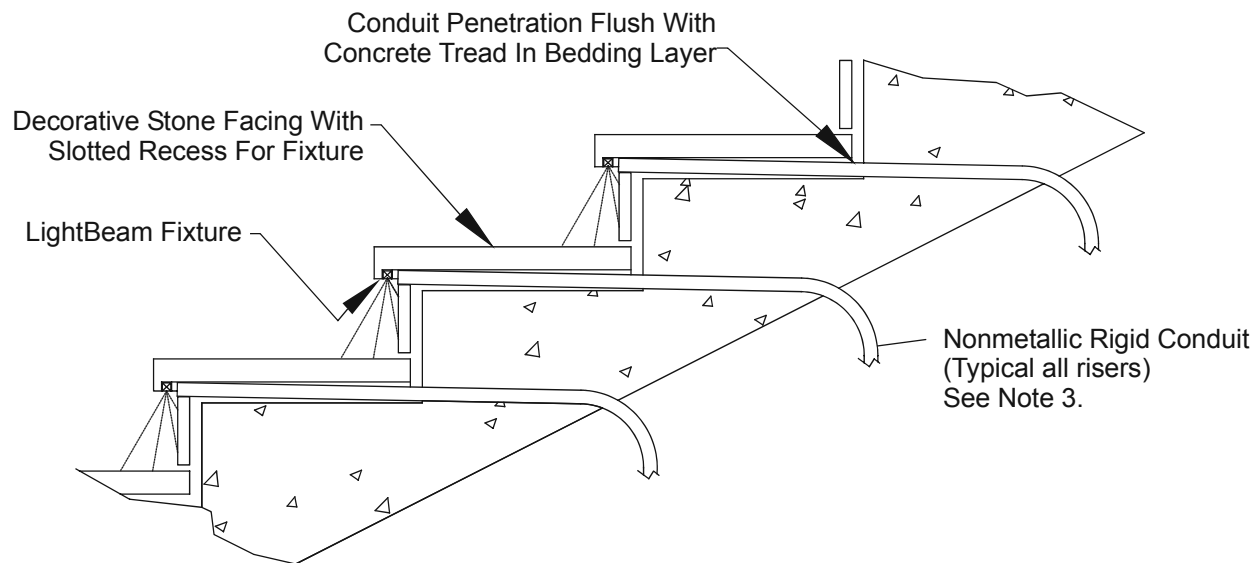

1. Attach fixtures with adjustable "Type H" brackets using threaded fasteners and/or VHB type adhesive.
2. Refer to fixture-cable dimensions to determine bend radius of feed Cable.
3. Install illuminator in vented location within 30 feet of illuminated panel.

## Stair Riser Lighting Installation

### NOTES:

1. Attach fixtures with high performance silicone adhesive (GE IS808) or equivalent.
2. Install illuminator in ventilated location, within 30 feet of stairway.
3. All conduit bends to be sweep type fittings.

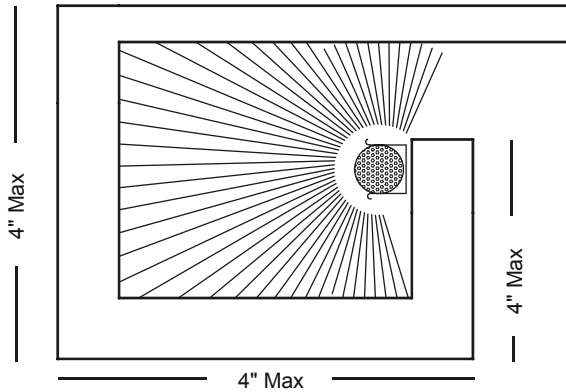

### Elevation (Section)

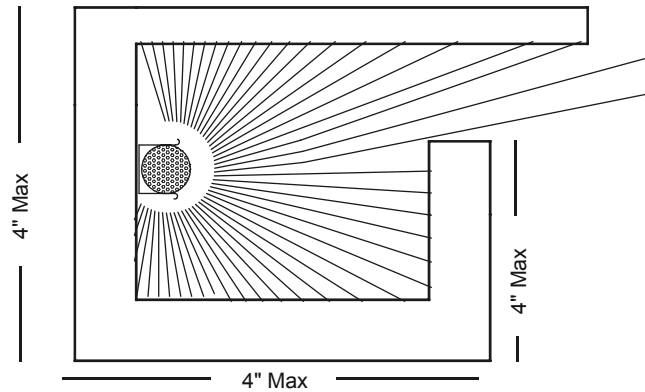

## Cove Lighting Installation

Page 31

### Cove Installation - Cove Glow Illumination

### Cove Installation - Ceiling Glow Illumination

Secure track or mounting clips to cove wall with screws (maintain height below viewing angle). Snap BritePak-III® fiber optic cable into track, or LightBeam™ to the mounting clips. Run fiber optic cable ends to illuminator.

***Note: When used in a cove, fiber optics will enhance an architectural detail but will not illuminate a room.***

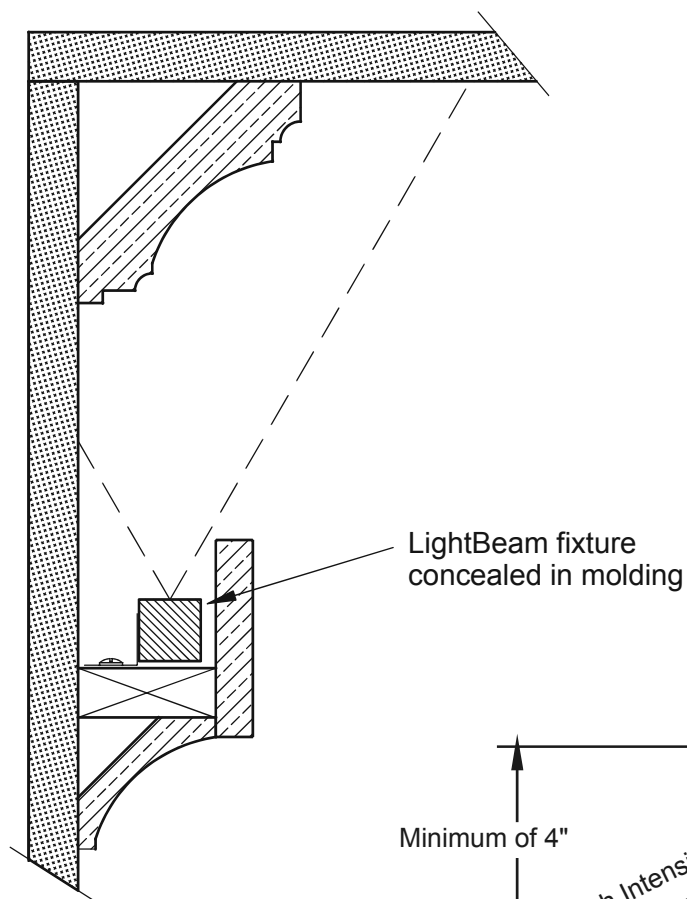

#### Guidelines for using BritePak® in a cove

1. Runs should not exceed 50' between illuminators.
2. Cove interior should be painted gloss white for the best reflective value.
3. Fiber should be installed as high in cove as possible without being seen from viewing area.
4. Installing two runs of fiber optic cable side by side will increase light output.
5. This option is only recommended in low ambient light conditions to create a "glow" in small dimensioned coves.

#### Guidelines for using LightBeam™ in a cove

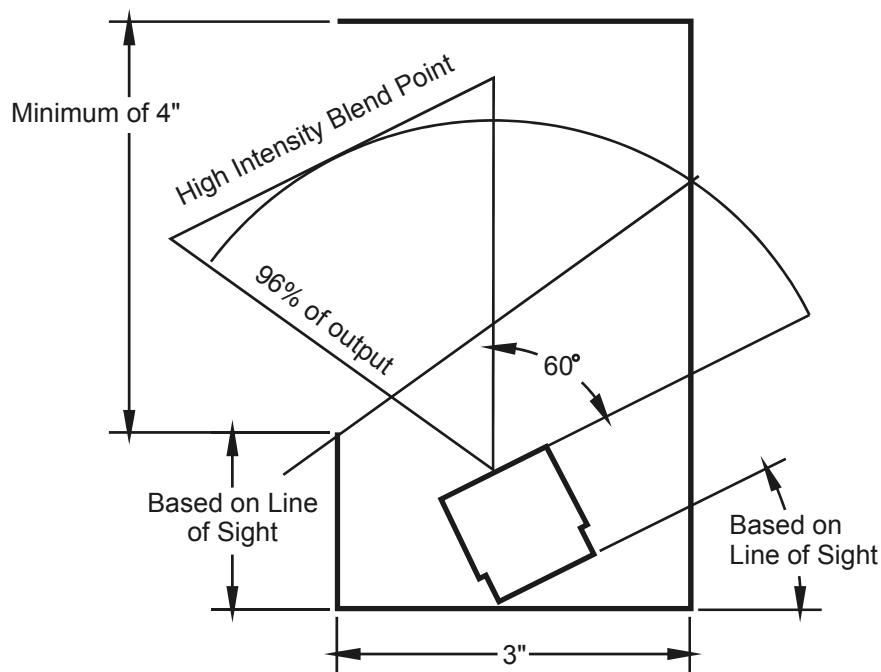

1. The first reflective surface should be 4" from the lighted face of a high intensity LightBeam.
2. The first reflective surface should be 6" from the lighted face of a medium intensity LightBeam.
3. Attach LightBeam fixtures with optional brackets and wood screws.
4. Install illuminator in ventilated location, within 30 feet of fixture.
5. Recommended for use in small and medium coves.

## Cove Lighting Installation (continued)

### NOTES:

1. Attach LightBeam fixtures with optional brackets and wood screws.
2. Install illuminator in ventilated location, within 30 feet of fixture.

The first reflective surface should be:  
4' from the lighted face of a high Intensity LB  
6" from the lighted face of a medium Intensity LB

# Star Ceiling Applications

e • (510) 490-3247 Fax • www.fiberstars.com

## Page 33

The "Star Ceiling" effect is a frequently requested Fiberstars application. There are too many factors that rely on personal aesthetic choices to give an exact formula for every application. That is why we have created three different "Star Ceiling Kits." **Star Ceiling Kit A** (300 stars) will cover an area from 30 to 140 sq ft depending on star density with a sparkle wheel effect; **Star Ceiling Kit B** (500 stars) will do the same, but also includes a "shooting star" effect, and **Star Ceiling Kit C** (800 stars) will cover larger ceilings, from 100 to 400 sq ft, also with a "shooting star" effect (see spec sheets for details). General guidelines as follows :

## How to Achieve the Effect

The "stars" are created by using individual strands of various sizes of multi-strand fiber in our STAR34/50 cable. These strands are threaded through the ceiling material to produce tiny bright points of lights. The fibers are then glued (with #FS-115 epoxy or FS-136 silicone) into place from the concealed side of the ceiling.

## Star Size and Saturation

- Small = .75 mm fiber
- Medium = 1.0 mm fiber
- Large = 1.5 mm fiber
- 1 - 6 "stars" per square foot (depending on the effect desired)

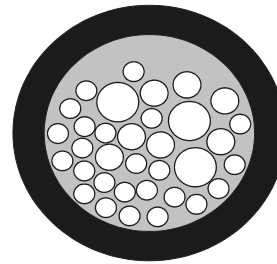

## Special Effects

- A sparkle wheel is included in each kit's illuminator.
- Star Ceilings Kits B & C also include a "shooting star" effect.

## Notes

- For custom star and effect ceilings contact our D/E/Q department at 1-877-777-7389.

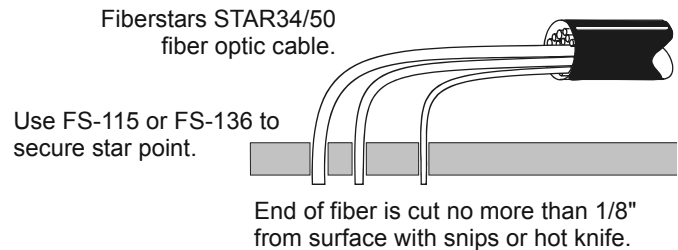

## STAR 34/50

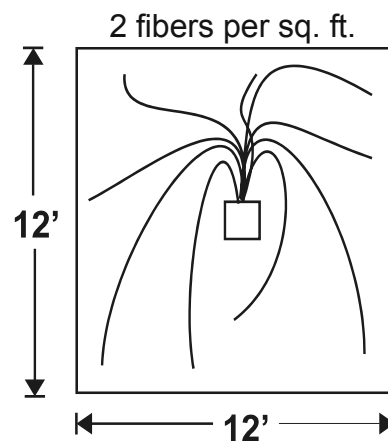

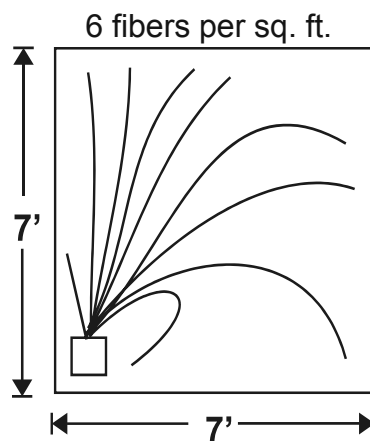

### STAR34/50 contains:

- 24 - .75mm strands
- 7 - 1.0mm strands
- 3 - 1.5mm strands

## Detail

## Plan View Star Kit A

# EFO Illuminator Mounting

## EFO® Illuminators

- Minimum clearance of 12" (on all sides except bottom) and must have sufficient ventilation.
- Must be accessible for relamping and maintenance.

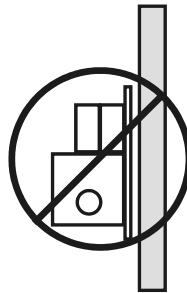

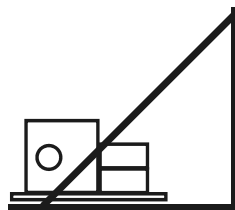

## EFO44, EFO33, EFO22, EFO11 Illuminators

Mount either: 1) Horizontally on a horizontal surface with either:

- No mounting accessories
- Caddy Rails (EFO-CR) for t-bar ceilings

**-OR-**

2) Horizontally to a vertical surface with Wall Mount Kit (AD-WM-KIT) (see diagrams below)

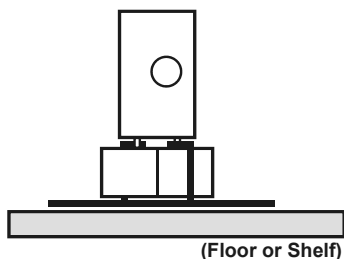

## EFO-AG Illuminators

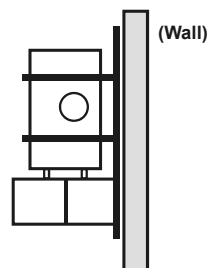

Mount either: 1) Horizontally on a horizontal surface with included mounting accessories (see diagrams below):

**-OR-**

2) Horizontally to a vertical surface with included mounting accessories (see diagrams below):

To preserve UL listing, use mounting plate and floor brackets (all included) when mounting to a horizontal surface

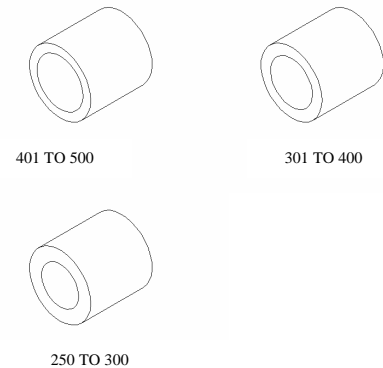

To preserve UL listing, use mounting plate and floor brackets (all included) when mounting to a vertical surface

# PORT ASSEMBLY / FIBER TERMINATION

## Terminating the Fiber into the Illuminator

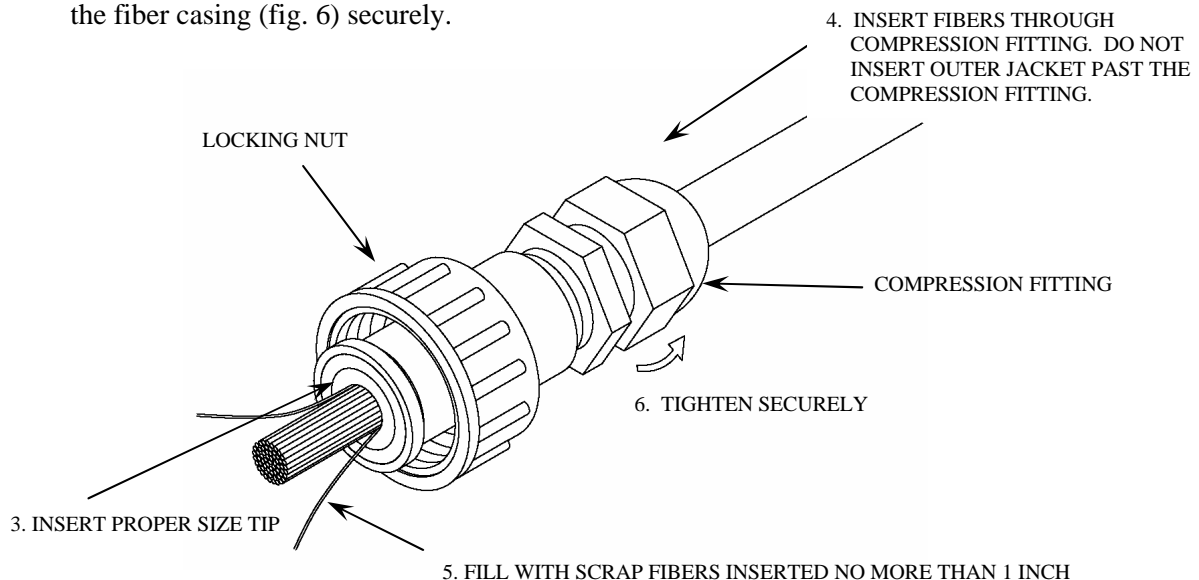

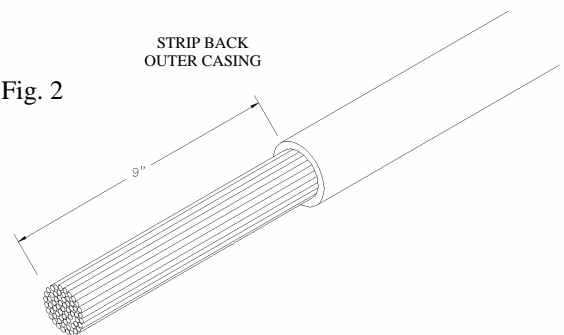

- A. Assure the total fiber count of all fiber bundles is between 250 and 500. If you have more than 500 individual fibers, you will need to use dual port or a second illuminator. The maximum capacity of the CPC illuminator is 500 fibers per port. If fiber count is much less than tip capacity (see fig. 1) a “fiber loop” may be used to raise fiber count so that fewer short scrap fibers are needed (see E. below); i.e. for fiber count of 250 use a 3 foot piece of FSPT-25, porting both ends into the tip thus forming a loop and raising the fiber count to 300 fibers. Assemble compression fitting to locking nut.

Fig. 1

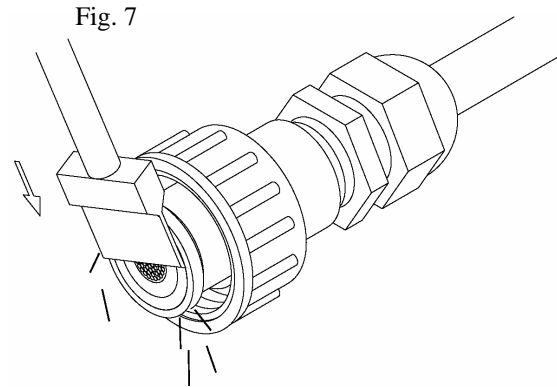

- B. Insert the proper size tip (fig.1) into the port (fig. 3). Ensure that the tapered end of the tip is facing into the port housing.
- C. Strip back all fiber casings no less than 9 inches (Fig. 2). Take care not to nick the fibers.
- D. Insert fibers through compression fitting port tip (fig.4). Be sure fiber jacket only inserts into the compression fitting. Pushing the outer jacket further into the port may cause fiber melting.
- E. **IMPORTANT:** If the port tip is not completely full (will not accept an additional single fiber), insert scrap individual fibers into the tip around the outside edge until it is completely full (fig.5). This will keep the lit fibers perpendicular to the lamp, and prevent the fibers from overheating. Be sure to insert the cut fibers no more than 1 inch into the port tip.
- F. Tighten the port compression nut down on the fiber casing (fig. 6) securely.

Fig. 2

- G. Using butane hot knife (p/n FS-163) with a **clean blade** (contamination of the fiber face may cause later fiber melting) apply firm downward pressure on the fibers, with the blade touching the cutting cap at a slight angle (fig. 7). Do not saw at the fibers. Allow the heat of the knife to slowly trim the fibers. This process takes a few minutes. Be patient! Ease the pressure as the knife almost completes the cut. Turn off hot knife and place in a safe spot for knife to cool.

- H. Install the o-ring into the o-ring groove on hub assembly. Be sure o-ring is seated properly in groove before attaching port assembly to illuminator hub. (fig.8) Thread the locking nut on the port assembly onto the hub of the CPC illuminator ensuring the port assembly is pushed firmly against the o-ring in the hub assembly. Tighten locking nut.(fig. 9)

Fig. 8

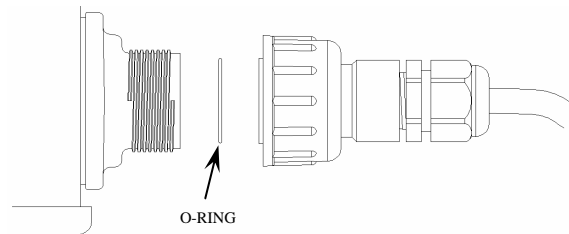

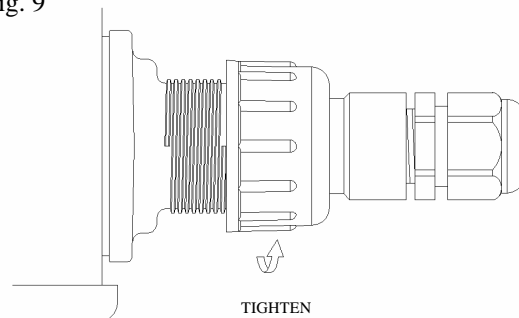

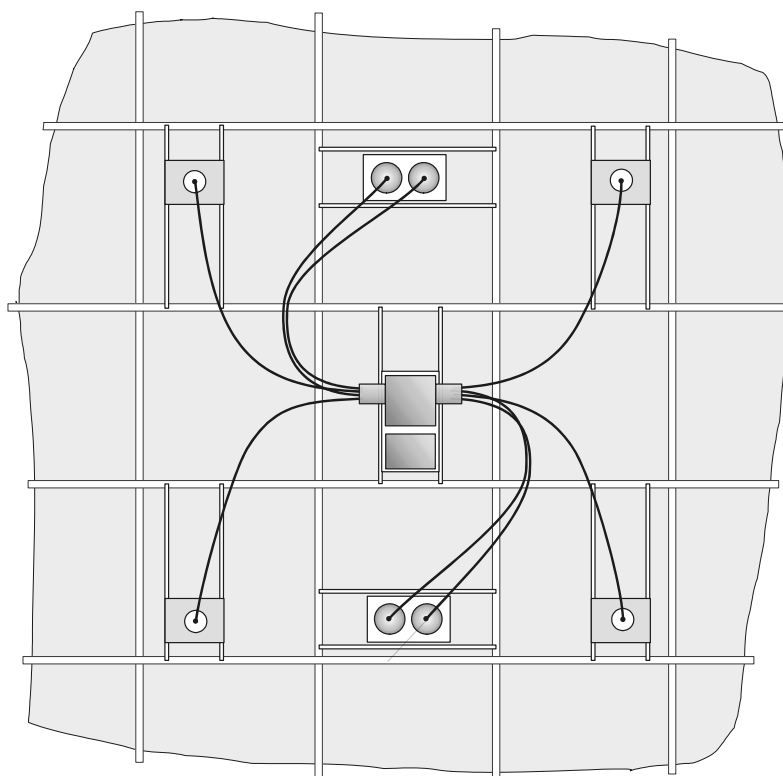

Fig. 9

**WARNING: CONTAMINATION OF FIBER WILL CAUSE FIBER TO MELT.**

- **KEEP FIBER FACE CLEAN**
- **DO NOT TOUCH FACE OF FIBER WITH HANDS**
- **ENSURE ALL TOOLS AND HOT KNIFE ARE CLEAN**

## EFO® Downlighting Installation—Drop Ceilings

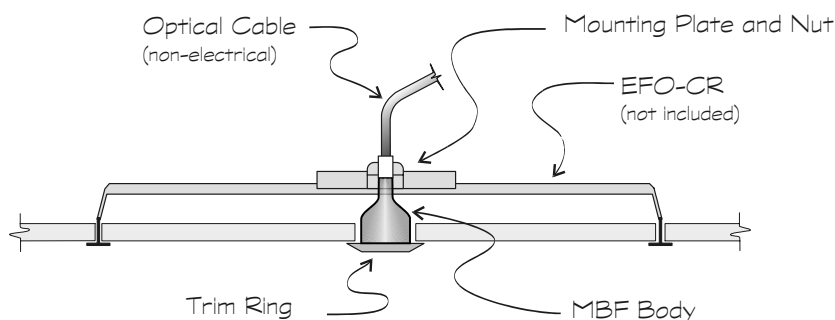

Use EFO downlights as you would any other downlights. Fixtures are available in adjustable and fixed aim, multiple adjustable beam spreads, and recessed in or protruding from the ceiling. Products for drop ceilings mount on the t-bar rails that hold the tiles. Some products include mounting hardware—see catalog spec sheets for details.

### MATERIALS SHOWN

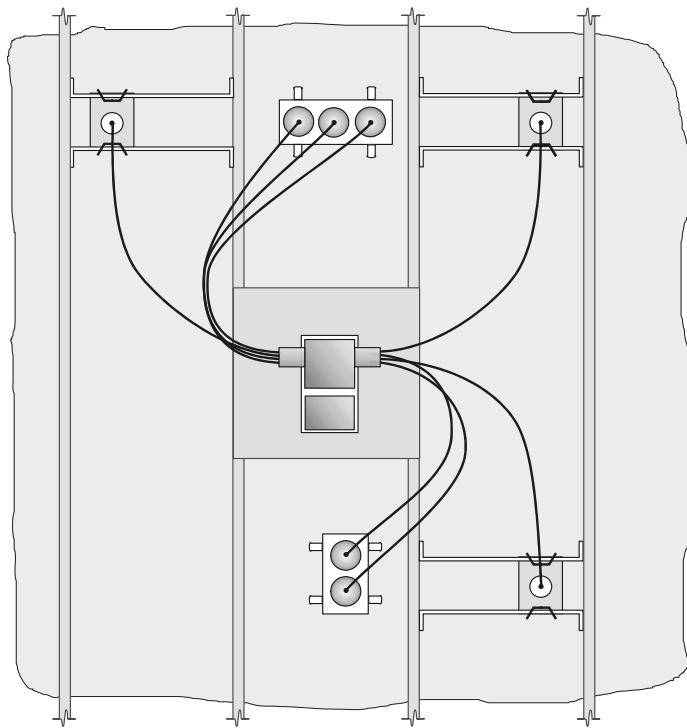

- (1) EFO-4+4-120 illuminator
- (8) EFO-12/10mm-10 cables
- (2) EFO-AAL-2R aimable fixtures—  
for accent lighting
- (4) EFO-MBF fixtures—  
for ambient lighting
- (7) Pair EFO-CR Caddy Rails

Plan view, EFO system  
on t-bar drop ceiling

## EFO® Downlighting Installation—Hard Ceilings

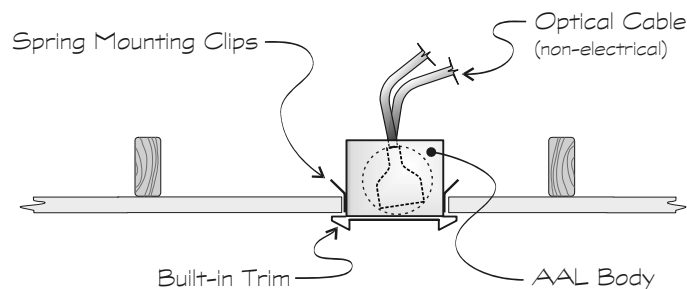

Use EFO downlights as you would any other downlights. Fixtures are available in adjustable and fixed aim, multiple adjustable beam spreads, and recessed in or protruding from the ceiling. Products for hard ceilings mount directly on the wallboard/plaster with spring clips or on rails attached to studs. Fixtures mounted with spring clips are installed from below the ceiling. Hard ceiling products include standard mounting hardware—see catalog spec sheets for details.

### MATERIALS SHOWN

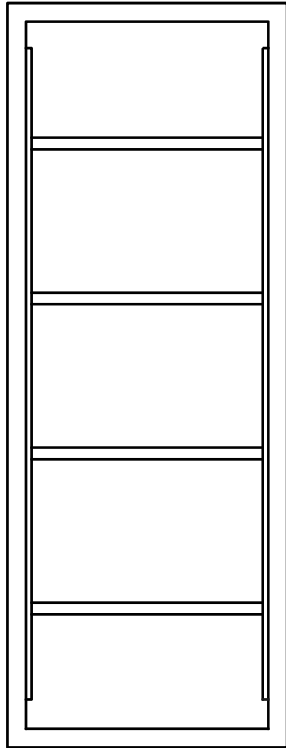

- (1) EFO-4+4-120 Illuminator
- (8) EFO-12/10mm-10 cable
- (1) EFO-AAL-3R-HC fixture—  
For aimable accent lighting
- (1) EFO-AAL-2R-HC fixture—  
For aimable accent lighting
- (3) EFO-MBF fixtures—  
for ambient lighting
- (3) Pair EFO-BH Flat Bar Hanger
- (3) Pair EFO-BFB Butterfly Brackets

Plan view, EFO system in hard ceiling

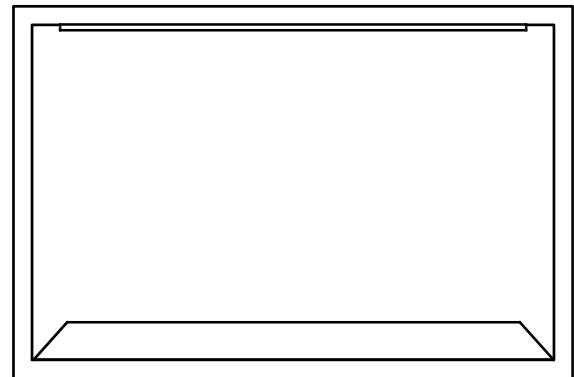

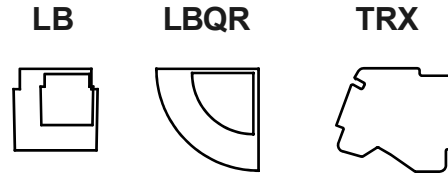

Section view, EFO-AAL-2R Mounted From  
Below the Ceiling with Spring Clips

## EFO Display Case Installation

**Tall Case**  
Vertical Fixture Orientation (Sides)

**Long Case**  
Horizontal Fixture Orientation (Top)

### NOTES:

1. Attach fixtures with adjustable LB-MB brackets using threaded fasteners and/or VHB type adhesive.
2. Refer to fixture-cable dimensions to determine bend radius of feed Cable.
3. Install illuminator in vented location within 30 feet of illuminated panel.

## LOANER EQUIPMENT FORM

### PURPOSE

Fiberstars keeps a limited supply of illuminators, fiber optic cable and fixtures for representatives to borrow for a specified amount of time and for specific reasons:

- For when the Agency's equipment is either already loaned out or not working.
- For doing mock-ups when the Agency needs additional equipment to supplement their own equipment.
- For demonstrating an illuminator that the Agency does not own.

### TERMS OF USE

- Fiberstars takes requests on a first come, first served basis.
- Fiberstars requires a minimum of two (2) working days.
- The standard loan time is ten (10) working days.
- Fiberstars pays for standard freight from the factory to the Agency. The Agency or their clients pay for air shipments.
- The Agency pays for freight to the next destination or back to Fiberstars by whatever method Fiberstars designates.
- If equipment is not returned on time, a fine of \$100.00 will be deducted from commission; future loan privileges revoked.
- If the representative does not call to request an extension and/or does not respond to repeated communication from Fiberstars within a timely manner, the Agency will be invoiced for the full price of the equipment and this amount will be deducted from commission.
- If the equipment is returned either damaged, missing parts or requiring refurbishing, Fiberstars will correct the problem and deduct the charges from the agency's commission.
- If an Agency decides to purchase the equipment they are borrowing, the representative needs to communicate this to Fiberstars so an invoice can be issued and Fiberstars loaner stock can be replenished. Once purchased, demo equipment is not returnable.

### DETAILED REQUEST

Ship What		Ship To	
Illuminator		Contact Name	
Fiber (Type, Length, Port, Ferrules, etc.)		Phone	
		Company Name	
		Address	
Fixtures		City/State/Zip
